Applied Text Analysis With Python

In this book, we focus
on applied machine

learning for text
analysis using the
Python libraries just
described. The applied
nature of the book
means that we focus
not on the academic
nature of linguistics or
statistical models, but
instead on how to be
effective at deploying
models trained on text
inside of a software
application.

Applied Text Analysis with Python (📖)

Reading Books into Python: Since, we were successful in testing our word frequency functions with the sample text. Now, we are going to test the functions with the books, which we downloaded as text file. We are going to create a function called `read_book()` which will read our books in

Python and save it as a long string in a variable and return it. The parameter to the function will be the location of the book.txt to be read and will be passed while calling the function.

Text Analysis in Python 3 - GeeksforGeeks

This skills-based specialization is intended for learners who have a basic python or programming background, and want to apply statistical, machine learning, information visualization, text analysis, and social network analysis techniques through popular python toolkits such as pandas, matplotlib, scikit-learn, nltk, and networkx to gain insight into their

data.

Applied Text Mining in Python | Coursera

Applied Text Analysis with Python: Enabling Language-Aware Data Products with Machine Learning. The programming landscape of natural language processing has changed dramatically in the past few years. Machine learning approaches now require mature tools like Python's scikit-learn to apply models to text at scale.
