Human Behavior and the Social Environment, Macro Level

Groups, Communities, and Organizations *Oxford University Press*

A timely revision in this global age, *Human Behavior and the Social Environment, Macro Level* develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit, and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key

characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. *

A Practice-Based Approach *Routledge*

The authors describe the current social work curriculum developed by the Council on Social Work Education Commission on Educational Policy and Accreditation Standards, demonstrating how client and constituency engagement, assessment, intervention, and evaluation are guided by knowledge of human behaviour and the

social environment (HBSE) theory. The Handbook applies HBSE theories differently depending on client system size, context, and needs. Major concepts include power, oppression, and identity formation. This essential, up-to-date volume formulates strategies to eliminate personal bias and to promote human rights. Human Behavior in the Social Environment

A Macro, National, and International Perspective *SAGE*

Human Behavior and the Social Environment: A Macro, National, and International Perspective is a textbook for one of the primary courses in the social work curriculum titled Human Behavior in the Social Environment. The course is offered usually over two semesters, with one focusing on micro issues (how the individual

develops in relation to their social environment on an individual, family, and group level). The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social environment by macro issues including social institutions, community, and the government. This book is intended for the second sequence of the course. It takes a unique approach by incorporating international issues of globalization, which has been an emerging issue in social work. Although it takes this unique perspective, it still covers the basics of macro social work on a national level. Other important areas that are not well represented in competing texts includes coverage of rural issues, the impact of hurricane Katrina on social and community resources, human rights and social justice, the increasing impact of increasing rates of incarceration, and a special section focusing on crisis theory. This book has a number of key selling points. They include: A broad national and international perspective A timely approach that examines issues such as rural communities, the impact of disaster on communities, and increasing incarceration rates Provides special emphasis on human needs and social justice End of chapter discussion questions A student glossary Chapter opening photos An appendix that includes three additional higher level macro theories which would make the book applicable to Master's level program This book will also contain a number of features that are essential for any book to be adopted in a HBSE course. They include: End of chapter discussion questions Instructor's manual featuring powerpoint slides and a test bank Student study site for recommended reading, chapter summaries, and flash cards

Human Behavior Theory and Social Work Practice *Routledge*

Human Behavior Theory and Social Work Practice remains a foundation work for those interested in the practice and teaching of social work. Roberta Greene covers theoretical areas and individual theorists including classical psychoanalytic thought, Eriksonian theory, Carl Rogers, cognitive theory, systems theory, ecological perspectives, social construction, feminism, and genetics. She discusses the historical context, its philosophical roots, and major assumptions of each theory. The general theme,

which distinguishes this volume, is that the person-in-environment perspective has been a central influence in the formation of the profession's knowledge base, as well as its approach to practice. Greene provides perspective on how individuals and social systems interact. This book examines how social workers can use theory to shape social work practice by increasing his or her understanding of and potential for enhancing human well-being. Greene covers the relationship between human behavior theory and professional social work practice. She also explores the challenges and limitations of each theory and addresses the following issues: how the theory serves as a framework for social work practice; how the theory lends itself to an understanding of individual, family, group, community, or organizational behavior; what the implications are of the theory for social work interventions or practice strategies; and what role it proposes for the social worker as a change agent. Throughout the profession's history, social workers have turned to a number of theoretical approaches for the organizing concepts needed to define their practice base. The aims of social work--to improve societal conditions and to enhance social functioning of and between individuals, families, and groups--are put into action across all fields of practice and realized through a variety of methods in a range of settings. This third edition, completely revised, represents a fundamental contribution to the field, and like its predecessors, will be widely used as a basic text.

Brooks/Cole Empowerment Series: Human Behavior in the Social Environment *Cengage Learning*

This lively, comprehensive introduction to human behavior in the social environment offers a multidimensional approach to the topic, with discussion of integrative practice, theory, treatment, and services as well as matters pertaining to diversity addressed throughout the text. The text provides solid coverage of foundation knowledge, integrates the biopsychosocial dimensions for assessing social functioning, and offers case studies to illuminate the applied aspects of the content. Furthermore, as part of the Brooks/Cole Empowerment Series, the fifth edition thoroughly integrates the core competencies and recommended practice behaviors outlined in the 2008 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping students connect foundation knowledge with specific practice concerns. Study tables and concept maps (for each discussion of behavior in the development chapters) clarify major phases of biopsychosocial development across the life span. This framework gives students a concrete tool for assessing human behavior from a perspective that reflects the values and knowledge base of the social work profession. Human Behavior and the Social Environment, Micro Level

Individuals and Families *Oxford University Press*

While social work policy can be considered the what, and practice, the how, the study of human behavior is concerned with why. Why do people do the things they do? Why do individuals behave differently in groups than when alone? Why do some people become the victims of their lives while others who have endured tragedy become life's heroes? Resilience across the life span is a new major theme of the second edition of the bestselling *Human Behavior and the Social Environment, Micro Level*. In an elegant and accessible manner, Katherine van Wormer explores the nuances of the biological, psychological, cultural, and spiritual dimensions of our social lives from an ecosystems and empowerment-based perspective. How to Rethink Human Behavior

A Practical Guide to Social Contextual Analysis *Routledge*

Developed from the author's long teaching career, *How to Rethink Human Behavior* aims to cultivate practical skills in human observation and analysis, rather than offer a catalogue of immutable 'facts'. It synthesizes key psychological concepts with insights from other disciplines, including sociology, social anthropology, economics, and history. The skills detailed in the book will help readers to observe people in their contexts and to analyze what they observe, in order to make better sense of why people do what they do, say what they say, and think what they think. These methods can also be applied to our own thoughts, talk and actions - not as something we control from 'within' but as events constantly being shaped by the idiosyncratic social, cultural, economic and other contexts in which our lives are immersed. Whether teaching, studying, or reading for pleasure, this book will help readers learn: How to think about people with ecological or contextual thinking How your thinking is a

conversation with other people How to analyze talk and conversations as social strategies How capitalist economies change how you act, talk and think in 25 ways How living in modern society can be linked to generalized anxiety and depression How to Rethink Human Behavior is important interdisciplinary reading for students and researchers in all fields of social science, and will especially appeal to those interested in mental health. It has also been written for the general reading public who enjoy exploring new ideas and skills in understanding themselves and other people.

Social Systems Theory *Allyn & Bacon*

A Novel of the Civil War at Sea This final volume in the Raphael Semmes trilogy of Civil War naval thrillers, *Seahawk Burning*, follows the real-life adventures of Confederate Captain Raphael Semmes and his ship, the C.S.S. Alabama, on the final legs of their reign of terror on the high seas. The novel chronicles Semmes's rise to mythic stature as he becomes Lincoln's public enemy number one, seizing and burning scores of Yankee ships in the Caribbean Sea, the south Atlantic, the Indian Ocean, and the South China Sea before heading to France for sanctuary...all the while dodging scores of federal Navy ships pursuing him. Enemy vessels, spy games, mutinies, storms, and loneliness stock Semmes's cruise during 1863-64. Meanwhile, back in the Lincoln White House, Secretary of the Navy Gideon Welles tries to marshal his warships to catch Semmes and simultaneously protect his president from spies and assassins, one of whom is Semmes's mistress. In addition to the main characters, the cast of *Seahawk Burning* includes historical figures from the governments and navies of the North and South as well as the Black Moses Harriet Tubman, John Wilkes Booth, and his fellow conspirators. All of the threads in this saga come together in a final showdown off Cherbourg, France, when Semmes decides to take the Alabama into battle against the U.S.S. Kearsarge, captained by his old friend John A. Winslow. It is one of the greatest naval battles in history.

Handbook of Human Behavior and the Social Environment

A Practice-Based Approach *Routledge*

Handbook of Human Behaviour and the Social Environment is a compendium of new theories for all aspects of social work practice. It pulls together major theories and concepts used in the field. By synthesizing this wide knowledge base via practical points of view and tracing the socio-historical evolution of its content and the role of the social worker, this handbook will assist social workers in achieving their primary goals: fostering human well-being and competent social functioning. The authors describe the current social work curriculum developed by the Council on Social Work Education Commission on Educational Policy and Accreditation Standards, demonstrating how client and constituency engagement, assessment, intervention, and evaluation are guided by knowledge of human behaviour and the social environment (HBSE) theory. The Handbook applies HBSE theories differently depending on client system size, context, and needs. Major concepts include power, oppression, and identity formation. This essential, up-to-date volume formulates strategies to eliminate personal bias and to promote human rights. In addition, it integrates ethics, research, policy content, diversity, human rights, and social, economic, and environmental justice issues. It will serve as an insightful and influential guide to students, professors, and social workers.

Mass Panic and Social Attachment

The Dynamics of Human Behavior *Routledge*

How do humans behave when under threat of attack or disaster? How does the social context affect individual behavior? Anthony Mawson provides an illuminating examination of individual and collective behavior under conditions of stress and danger, in response to both natural and manmade threats and disasters. Opening with a question about the interpretation of "mass panic" in combat, the book gradually unfolds into a multidisciplinary analysis of the psychobiological basis of social relationships and the neural organization of motivation and emotion. Mawson provides a comprehensive review and synthesis of the mass panic and disaster literature and offers a social attachment model, that recognizes the fundamentally gregarious nature of human beings and the primacy of attachments. He argues that the typical response to threat and danger is neither fight nor flight, nor social breakdown, but increased affiliation and camaraderie. This book is unique in addressing the behavioral and social aspects of threat and disaster. It will appeal to social scientists across a range of disciplines, to public administrators, and to disaster and public health professionals.

Performing Action

Artistry in Human Behavior and Social Research *Routledge*

In recent years the social sciences and the humanities have drawn closer to each other in thought and method. This rapprochement has led to new perceptions of human behavior by sociologists, as well as new methodological orientations. Sociologist Joseph R. Gusfield draws upon drama and fiction to show how human action is shaped by the formal dimensions of performance. Gusfield first defines the concept of behavior as artistic performance. He then analyzes routine and classic social research reports as literary performances in qualitative and quantitative terms. Next he moves to social movements and public actions, demonstrating how objects and events are products of the interpretation and reflection of individuals. He draws upon literary and artistic conventions to deal with issues of representation and meaning. In the first and last chapters, Gusfield provides a conceptual summary examining the relation between sociology as science and art, arguing that sociological methods are neither science nor art, but partake of both. Following the philosopher Paul Ricoeur, Gusfield shows how human behavior can be read as a text, always telling the participant or observer "something about something." Performing Action will be of interest to sociologists, psychologists, and students of aesthetics and critical theory.

Human Behavior and the Social Environment

Social Systems Theory *Pearson Higher Ed*

Presents major theories for systems addressed in generalist practice This text is part of the Connecting Core Competencies Series. Human Behavior and the Social Environment: Social Systems Theory provides an expanded treatment of systems theory, and applies the theory to common social work concerns. The text links systems to social roles, and provides a framework for critical assessment of the theories from the systems/roles perspective. It assesses the strengths and weaknesses of each theory with regard to the value of each theory for social work practice. Social systems theory remains the focus of this text. In addition theories are identified as grand theories, middle range theories, or focal theories, to assist the student in understanding the scope and application of theories across system sizes. This text breaks new ground in using role theory as a middle range theory to address common features of human systems at a level that is more intuitive for students, and yet detailed enough to stimulate independent thinking. The text addresses the standard repertoire of theories, and in addition presents application of the theories to social issues such as violence and addiction. A better teaching and learning experience This program will provide a better teaching and learning experience—for you and your

students. Here's how: Improve Critical Thinking – Links systems processes and concepts to role theory as a middle range perspective. Engage Students – Relates social systems concepts to the contexts of generalist social work practice Explore Current Issues – Provides an integrative perspective for the diverse theories used by social workers Apply CSWE Core Competencies – The text integrates the 2008 CSWE EPAS, with critical thinking questions and practice tests to assess student understanding and development of competency. Development on Purpose

Faith and Human Behavior in the Social Environment

Development on Purpose: Faith and Human Behavior in the Social Environment provides both students and seasoned professionals with a coherent framework for considering HBSE from a Christian

perspective. Courses in human behavior and the social environment (HBSE) raise important questions about the nature of persons and our multi-layered social world. The Christian faith offers answers to these deep questions about human nature and our relationships with one another and the world. Also, Christianity provides a compelling purpose for human development. As social workers, this grand purpose can rightly inform the trajectory of our own lives and sustain our work on behalf of those at risk in the world. The first half of *Development on Purpose* outlines a purpose for human development, examining biological, psychological, and social theories through the lens of faith. This includes chapters on: Biblical Themes to Ground Us A Theological Model for Understanding Human Behavior in the Social Environment (HBSE) The Perspectives of Social Work from the Lens of Faith The Biological Dimension The Psychological Dimension The Social Dimension The second half of *Development on Purpose* then uses detailed case examples to illuminate the way that faith can relate to work with persons across the lifespan. This includes chapters on: Infancy: Early Growth toward God and Others Childhood: Playing and Learning (ages 3-12) Adolescence: Leaning into Identity (ages 13-18) Emerging Adulthood: Feeling In-Between Middle Adulthood: At the Intersection of Growth and Decline Older Adulthood: Finishing Well In showing how a Christian understanding of humans can inform the study and practice of social work, the book's chapters can be used interchangeably, making this an excellent companion text for *Human Behavior in the Social Environment* and related courses in faith-based social work programs. *Development On Purpose* contains 12 chapters and

more than 225 pages.
