Veteran software developers know the Hello World program as the first step in learning to code. The program, which outputs some variant of "Hello, World!" on a device's display, can be created in most languages, making it some of the most basic syntax involved in the coding process.

The History of Hello World - The Software Guild

A "Hello, World!" program generally is a computer program that outputs or displays the message "Hello, World!". Such a program is very simple in most programming languages, and is often used to illustrate the basic syntax of a programming language. It is often the first program written by people learning to code. It can also be used as a sanity test to make sure that a computer language is correctly installed, and that the operator understands how to use it.
