I had much interest in the so-called exotic cuisines that were quickly becoming popular. Americans were searching outside the country for inspiration and sustenance, and this curiosity was really something worth supporting. It was an awesome experience traveling the world, sampling new dishes and picking up ideas, and then trying out all I had gathered back home right in my own kitchen. Soon after I was done writing the series, I looked inward with a newfound passion for local American foods. I felt a spark burning while I was starting my book tour in the Pacific Northwest. Maybe the colorful Pacific oysters in the Pike Place Market in Seattle had to do with it. Or perhaps, it was the season's first Copper River salmon, grilled to perfection and paired with an Oregon Pinot Noir that's flowery and fruity. Or it could be my first time to sample caramelized Kasu cod at Seattle's Dahlia Lounge. I can't tell for sure. All I knew was that I had to begin writing the U.S Cookbook "The Southern Cookbook 365"! Representing Australian Aboriginal Music and Dance 1930-1970 *Bloomsbury Publishing USA*

Shortlisted for the 2021 Prime Minister's Literary Award for

Australian History. Representing Australian Aboriginal Music and Dance 1930-1970 offers a rethinking of recent Australian music history. Amanda Harris presents accounts of Aboriginal music and dance by Aboriginal performers on public stages. Harris also historicizes the practices of non-Indigenous art music composers evoking Aboriginal music in their works, placing this in the context of emerging cultural institutions and policy frameworks. Centralizing auditory worlds and audio-visual evidence, Harris shows the direct relationship between the limits on Aboriginal people's mobility and non-Indigenous representations of Aboriginal culture. This book seeks to listen to Aboriginal accounts of disruption and continuation of Aboriginal cultural practices and features contributions from Aboriginal scholars Shannon Foster, Tiriki Onus and Nardi Simpson as personal interpretations of their family and community histories. Contextualizing recent music and dance practices in broader histories of policy, settler colonial structures, and postcolonizing efforts, the book offers a new lens on the development of Australian musical cultures.

'Weaving together science, history, antiquarianism and art, this stimulating collection of essays amply demonstrates Thomas Pennant's centrality to a broad range of British Enlightenment debates and discourses, especially those relating to Britain's so-called "Celtic Fringe". At the same time, it underscores the epistemological importance of travel and travel writing in the late eighteenth century.' —Carl Thompson, Senior Lecturer in English, St Mary's University, UK

Scientific Realism in Particle Physics

A Causal Approach *Walter de Gruyter GmbH & Co KG*

Particle physics studies highly complex processes which cannot be directly observed. Scientific realism claims that we are nevertheless warranted in believing that these processes really occur and that the objects involved in them really exist. This book defends a version of scientific realism, called causal realism, in the context of particle physics. The first part of the book introduces the central theses and arguments in the recent philosophical debate on scientific realism and discusses entity realism, which is the most important precursor of causal realism. It also argues against the view that the very debate on scientific realism is not worth pursuing at all. In the second part, causal realism is developed and the key distinction between two kinds of warrant for scientific claims is clarified. This distinction proves its usefulness in a case study analyzing the discovery of the neutrino. It is also shown to be effective against an influential kind of pessimism, according to which even our best present theories are likely to be replaced some day by radically distinct alternatives. The final part discusses some specific challenges posed to realism by quantum physics, such as non-locality, delayed choice and the absence of particles in relativistic quantum theories.

Avoiding Surprise in an Era of Global Technology Advances *National Academies Press*

The global spread of science and technology expertise and the growing commercial access to advanced technologies with possible military application are creating potentially serious threats to the technological superiority underpinning U.S. military strength. Key to dealing with this situation is the ability of the U.S. intelligence community to be able to provide adequate and effective warning of evolving, critical technologies. To assist in performing this task, the Technology Warning Division of the Defense Intelligence Agency (DIA) asked the National Research Council (NRC) to undertake a study examining technology warning issues. This report provides the first part of that study. It presents an assessment of critical, evolving technologies; postulates ways potential adversaries could disrupt these technologies; and provides indicators for the intelligence community to determine if such methods are under development. The intention of this report is to establish the foundation for a long-term relationship with the technology warning community to support the examination of technology warning issues.

I had much interest in the so-called exotic cuisines that were quickly becoming popular. Americans were searching outside the country for inspiration and sustenance, and this curiosity was really something worth supporting. It was an awesome experience traveling the world, sampling new dishes and picking up ideas, and then trying out all I had gathered back home right in my own kitchen. Soon after I was done writing the series, I looked inward with a newfound passion for local American foods. I felt a spark burning while I was starting my book tour in the Pacific Northwest. Maybe the colorful Pacific oysters in the Pike Place Market in Seattle had to do with it. Or perhaps, it was the season's first Copper River salmon, grilled to perfection and paired with an Oregon Pinot Noir that's flowery and fruity. Or it could be my first time to sample caramelized Kasu cod at Seattle's Dahlia Lounge. I can't tell for sure. All I knew was that I had to begin writing the U.S Cookbook "Cajun Cookbook 365"!
