Study Guide For Respiratory System Biology 11

Definition: The
respiratory system
(also referred to as the
ventilator system) is a
complex biological
system comprised of
several organs that
facilitate the inhalation
and exhalation of
oxygen and carbon
dioxide in living
organisms (or, in other
words, breathing).

Most of the organs of the respiratory system help to distribute air, but only the tiny, grape-like alveoli and the alveolar ducts are responsible for actual gas exchange.

Respiratory System (Anatomy) - Msrblog

one of the several blood-group antigens

carried on the surface of red blood cells. respiratory system. a collection of organs whose primary function is to take in oxygen and expel carbon dioxide; the organs of this system include the lungs, the throat, and the passageways that lead to the lungs. external respiration.
