Potty Training a Child with Autism - Gina Davies

Potty training in a week is a slower yet effective approach. Some child development experts advocate training only in the morning and

afternoon for several hours at a time. During this timeframe, parents will watch their child carefully and place him on the potty every 15 minutes. The child will wear a diaper or pull-up for the rest of the day.

Potty Training for Kids - The Complete Guide

Potty training is usually fastest if your child is at the last stage before you start the training. If you start earlier, be prepared for a lot of accidents as your child learns. They also need to be able to sit on the potty and get up from it when they're done, and follow your instructions. Getting ready for potty training

How to potty train - NHS

Why did we develop

this potty training programme? Because we want to help parents potty train their child within one week and because coaching is essential in order to keep at it. It's an intense programme with great results! For one week, your undivided attention will be required (tip: take it in turns, school holidays are ideal). This way you'll end up saving time and you'll get it done ...
