**The Art of Helping Others** *Jessica Kingsley Publishers*

When searching for someone to help them reflect upon and improve their lives, people tend to be drawn towards those who are compassionate, committed and wise. This book is aimed at those who recognise these qualities in themselves and wish to develop their capacity to engage with and help others. The authors argue for ways of approaching helping and counselling that are rooted in care and commitment, drawing upon the experiences and practice wisdom of youth workers, housing support and hostel workers, the clergy and those working in a religious setting, educators and settlement and community workers. They explore the key characteristics of those who counsel and teach and examine aspects of the helping process, focusing on living life well, knowing and being oneself, relating to others and working to make change possible. This book will be essential reading for students on professional training programmes in youth work, community education, ministry, social care and counselling.

**The Art of Changing the Brain** *Stylus Publishing, LLC*

Neuroscience tells us that the products of the mind--thought, emotions, artistic

creation--are the result of the interactions of the biological brain with our senses and the physical world: in short, that thinking and learning are the products of a biological process. This realization, that learning actually alters the brain by changing the number and strength of synapses, offers a powerful foundation for rethinking teaching practice and one's philosophy of teaching. James Zull invites teachers in higher education or any other setting to accompany him in his exploration of what scientists can tell us about the brain and to discover how this knowledge can influence the practice of teaching. He describes the brain in clear non-technical language and an engaging conversational tone, highlighting its functions and parts and how they interact, and always relating them to the real world of the classroom and his own evolution as a teacher. "The Art of Changing the Brain" is grounded in the practicalities and challenges of creating effective opportunities for deep and lasting learning, and of dealing with students as unique learners.

**The Art of Helping Others** *InterVarsity Press*

Musicians, artists and other creative types are pulled in many directions by society's conflicted vision for the arts. Doug Mann, from his vantage point as a Christian visual artist and music industry veteran, offers guidance for staying true to an artistic vision while remaining connected to the world's needs.

**Introduction to Counseling** *SAGE Publications*

Introduction to Counseling by Michael Scott Nystul provides an overview of counseling and the helping professions from the perspective of art and

science—the science of counseling that generates a knowledge base proven to promote competency and efficacy in the practitioner, and the art of using this knowledge base to build skills that can be applied sensitively to clients in a multicultural society. The Fifth Edition has been organized into three sections: (1) an overview of counseling and the counseling process, (2) multicultural counseling and counseling theories, and (3) special approaches and settings. It continues to address key topics and issues, including gender, culture, and sexual orientation, and offers ways to integrate multiculturalism into all aspects of counseling, rather than view it as a separate entity. Highlighting emerging trends and changes in ethical codes, as well as reflecting the latest updates to the Diagnostic Statistical Manual (DSM-5), the book successfully illustrates the importance of art and science to modern-day counseling.

### **Helping Berrett-Koehler Publishers**

A Strategy+Business Best Leadership Book of the Year: An “uncommonly wise” analysis of the psychological and social dynamics of helping relationships (Warren Bennis, author of *On Becoming a Leader*). *Helping* is a fundamental human activity, but it can also be a frustrating one. All too often, to our bewilderment, our sincere offers of help are resented, resisted, or refused—and we often react the same way when people try to help us. Why is it so difficult to provide or accept help? How can we make the whole process easier? Many words are used for helping: assisting, aiding, advising, caregiving, coaching, consulting, counseling, guiding, mentoring, supporting, teaching, and more. In this seminal book on the topic, corporate culture and

organizational development guru Ed Schein analyzes the social and psychological dynamics common to all types of helping relationships, explains why help is often not helpful, and shows what any would-be helpers must do to ensure that their assistance is both welcomed and genuinely useful. He shows how to navigate the delicate acts of asking for or offering help; avoid pitfalls; mitigate power imbalances; and establish a solid foundation of trust—and how these techniques can be applied to teamwork and organizational leadership. From the bestselling author of *Organizational Culture and Leadership*, and illustrated with examples from many types of relationships—husbands and wives, doctors and patients, consultants and clients—*Helping* is a concise, definitive analysis of what it takes to establish successful, mutually satisfying helping relationships.

### **The Art of Effective Facilitation Stylus Publishing, LLC**

How can I apply learning and social justice theory to become a better facilitator? Should I prepare differently for workshops around specific identities? How do I effectively respond when things aren't going as planned? This book is intended for the increasing number of faculty and student affairs administrators – at whatever their level of experience -- who are being asked to become social justice educators to prepare students to live successfully within, and contribute to, an equitable multicultural society. It will enable facilitators to create programs that go beyond superficial discussion of the issues to fundamentally address the structural and cultural causes of inequity, and provide students with the knowledge and skills to work for a more

just society. Beyond theory, design, techniques and advice on practice, the book concludes with a section on supporting student social action. The authors illuminate the art and complexity of facilitation, describe multiple approaches, and discuss the necessary and ongoing reflection process. What sets this book apart is how the authors illustrate these practices through personal narratives of challenges encountered, and by admitting to their struggles and mistakes. They emphasize the need to prepare by taking into account such considerations as the developmental readiness of the participants, and the particular issues and historical context of the campus, before designing and facilitating a social justice training or selecting specific exercises. They pay particular attention to the struggle to teach the goals of social justice education in a language that can be embraced by the general public, and to connect its structural and contextual analyses to real issues inside and outside the classroom. The book is informed by the recognition that “the magic is almost never in the exercise or the handout but, instead, is in the facilitation”; and by the authors’ commitment to help educators identify and analyze dehumanizing processes on their campuses and in society at large, reflect on their own socialization, and engage in proactive strategies to dismantle oppression.

### **The Art of Gathering Penguin**

"Hosts of all kinds, this is a must-read!" -  
-Chris Anderson, owner and curator of TED From the host of the New York Times podcast *Together Apart*, an exciting new approach to how we gather that will transform the ways we spend our time together—at home, at work, in our communities, and beyond. In *The Art of Gathering*, Priya Parker argues that the gatherings in our lives are lackluster and unproductive--which they don't have to be. We rely too much on routine and the conventions of gatherings when we should focus on distinctiveness and the people involved. At a time when coming together is more important than ever, Parker sets forth a human-centered approach to gathering that will help everyone create meaningful, memorable experiences, large and small, for work and for play. Drawing on her expertise as a facilitator of high-powered gatherings around the world, Parker takes us inside events of all kinds to show what works, what doesn't, and why. She investigates a wide array of gatherings--conferences, meetings, a courtroom, a flash-mob party, an Arab-Israeli summer camp--and explains how simple, specific changes can invigorate any group experience. The result is a book that's both journey and guide, full of exciting ideas with real-world applications. *The Art of Gathering* will forever alter the way you look at your next meeting, industry conference, dinner party, and backyard barbecue--and how you host and attend them.

**A Guide to Teaching in the Active Learning Classroom** *Stylus Publishing, LLC*

While Active Learning Classrooms, or ALCs, offer rich new environments for learning, they present many new challenges to faculty because, among other things, they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs, briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based, practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are:

- How can instructors mitigate the apparent lack of a central focal point in the space?
- What types of learning activities work well in the ALCs and take advantage of the affordances of the room?
- How can teachers address familiar classroom-management challenges in these unfamiliar spaces?
- If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central

focus point? • How do instructors balance group learning with the needs of the larger class? • How can students be held accountable when many will necessarily have their backs facing the instructor? • How can instructors evaluate the effectiveness of their teaching in these spaces? This book is intended for faculty preparing to teach in or already working in this new classroom environment; for administrators planning to create ALCs or experimenting with provisionally designed rooms; and for faculty developers helping teachers transition to using these new spaces.

**Learning the Art of Helping** *Pearson*

**The Art of Asking** *Grand Central Publishing*

FOREWORD BY BRENE BROWN and POSTSCRIPT FROM BRAIN PICKINGS CREATOR MARIA POPOVA Rock star, crowdfunding pioneer, and TED speaker Amanda Palmer knows all about asking. Performing as a living statue in a wedding dress, she wordlessly asked thousands of passersby for their dollars. When she became a singer, songwriter, and musician, she was not afraid to ask her audience to support her as she surfed the crowd (and slept on their couches while touring). And when she left her record label to strike out on her own, she asked her fans to support her in making an album, leading to the world's most successful music Kickstarter. Even while Amanda is both celebrated and attacked for her fearlessness in asking for help, she finds that there are important things she cannot ask for--as a musician, as a friend,

and as a wife. She learns that she isn't alone in this, that so many people are afraid to ask for help, and it paralyzes their lives and relationships. In this groundbreaking book, she explores these barriers in her own life and in the lives of those around her, and discovers the emotional, philosophical, and practical aspects of THE ART OF ASKING. Part manifesto, part revelation, this is the story of an artist struggling with the new rules of exchange in the twenty-first century, both on and off the Internet. THE ART OF ASKING will inspire readers to rethink their own ideas about asking, giving, art, and love.

Adding to the sustained influence of their previous books, especially *Telling Ain't Training*, Harold and Erica have written a fun, effective guide on how to make your know-how stick to another's brain. The 12 chapters each focus on a single theme and are sequenced like stepping-stones to help you understand how to best transfer know-how to those who learn from you. Chapters include brief

explanations, guidance, tools, activities, tangible and accessible examples of real-world applications, and a summary exercise to reinforce your retention of key points. **Lost in Learning** *Athenaeum Pub.*

Learning may well be the most profound

power on earth. Its force shapes entire civilizations and transforms the world, one individual at a time. Yet, all too often we allow this remarkable force to become diluted. The moment learning becomes a mundane succession of texts, tests, and tedium, is the moment we lose that vital connection to the wonders of human creativity and discovery which infuse our work, our learning and our very lives with purpose. For those seeking to link learning to their life's aspirations, this book offers the invitation to embark upon the journey of a lifetime. Through a body of stunning historical photographs, Eva Kolvea Timothy breathes new life into an age when learning was life's grand adventure and where genius was less a matter of genetics than of passion and perspective. Turning her lens upon the lives of history's heroes, she has revealed the key to a great secret: That we too, like the celebrated luminaries of old, are born: Creators, Discoverers and Dreamers. So come set sail with Columbus, soar among the heavens with Galileo, dive into drawings of Da Vinci and discover the passion which moved the masters of an age as they lost themselves in the rapture that is great learning.

**Applied Helping Skills** SAGE Publications

weave humor and passion into their engaging prose, effectively conveying their excitement and satisfaction for doing helping work.

An instant bestseller that is poised to become a classic, *Moonwalking with Einstein* recounts Joshua Foer's yearlong quest to improve his memory under the tutelage of top "mental athletes." **Trauma Intelligence** *PYP Academy Press*

At some point in our lives, most of us experience trauma. Left unaddressed, the deep and painful emotions that result from these unresolved traumas can have a profound and lasting impact. These ripple effects can disrupt our emotional well-being and diminish our relationships and quality of life. In *Trauma Intelligence*, Blythe Landry describes the five major categories of trauma and common mental and physical symptoms associated with traumatic stress. Landry provides relatable examples and outlines specific responses people have to each type of trauma. She also provides recommended strategies for supporting trauma survivors and their loved ones. Landry introduces the concept of Trauma Intelligence: the learned ability to understand, process, and respond to trauma in more effective, empathic, and compassionate ways. Whether you are a trauma survivor, a mental health professional, educator, coach, thought leader, someone who loves a survivor, or just a caring human being, this book will increase your understanding of trauma and its effects and give you tools for responding in ways that can truly make a difference. While we can't change what has happened in the past to ourselves or those we love, and we can't always

predict when tragedy or pain will befall us, we can change how we respond moving forward.

**The Art of Statistics** *Basic Books*

In this "important and comprehensive" guide to statistical thinking (New Yorker), discover how data literacy is changing the world and gives you a better understanding of life's biggest problems. Statistics are everywhere, as integral to science as they are to business, and in the popular media hundreds of times a day. In this age of big data, a basic grasp of statistical literacy is more important than ever if we want to separate the fact from the fiction, the ostentatious embellishments from the raw evidence -- and even more so if we hope to participate in the future, rather than being simple bystanders. In *The Art of Statistics*, world-renowned statistician David Spiegelhalter shows readers how to derive knowledge from raw data by focusing on the concepts and connections behind the math. Drawing on real world examples to introduce complex issues, he shows us how statistics can help us determine the luckiest passenger on the Titanic, whether a notorious serial killer could have been caught earlier, and if screening for ovarian cancer is beneficial. *The Art of Statistics* not only shows us how mathematicians have used statistical science to solve these problems -- it teaches us how we too can think like statisticians. We learn how to clarify our questions, assumptions, and expectations when approaching a problem, and -- perhaps even more importantly -- we learn how to responsibly interpret the answers we receive. Combining the incomparable insight of an expert with the playful enthusiasm of an aficionado, *The Art of*

Statistics is the definitive guide to stats that every modern person needs.

### **Prepared** *Currency*

A blueprint for how parents can stop worrying about their children's future and start helping them prepare for it, from the cofounder and CEO of one of America's most innovative public-school networks "A treasure trove of deeply practical wisdom that accords with everything I know about how children thrive."—Angela Duckworth, New York Times bestselling author of *Grit* In 2003, Diane Tavenner cofounded the first school in what would soon become one of America's most innovative public-school networks. Summit Public Schools has since won national recognition for its exceptional outcomes: Ninety-nine percent of students are accepted to a four-year college, and they graduate from college at twice the national average. But in a radical departure from the environments created by the college admissions arms race, Summit students aren't focused on competing with their classmates for rankings or test scores. Instead, students spend their days solving real-world problems and developing the skills of self-direction, collaboration, and reflection, all of which prepare them to succeed in college, thrive in today's workplace, and lead a secure and fulfilled life. Through personal stories and hard-earned lessons from Summit's exceptional team of educators and diverse students, Tavenner shares the learning philosophies underlying the Summit model and offers a blueprint for any parent who wants to stop worrying about their children's future—and start helping them prepare for it. At a time when many students are struggling to regain educational and developmental ground

lost to the disruptions of the pandemic, Prepared is more urgent and necessary than ever.

### **You Make the Difference in Helping Your Child Learn**

#### **What Is God Like?** *Convergent Books*

#1 NEW YORK TIMES BESTSELLER • The late, beloved Rachel Held Evans answers many children's first question about God in this gorgeous picture book, fully realized by her friend Matthew Paul Turner, the bestselling author of *When God Made You*. Children who are introduced to God, through attending church or having loved ones who speak about God, often have a lot of questions, including this ever-popular one: What is God like? The late Rachel Held Evans loved the Bible and loved showing God's love through the words and pictures found in that ancient text. Through these pictures from the Bible, children see that God is like a shepherd, God is like a star, God is like a gardener, God is like the wind, and more. God is a comforter and support. And whenever a child is unsure, *What Is God Like?* encourages young hearts to "think about what makes you feel safe, what makes you feel loved, and what makes you feel brave. That's what God is like."

#### **Helping People Change** *Harvard Business Press*

You're trying to help--but is it working? Helping others is a good thing. Often, as a leader, manager, doctor, teacher, or coach, it's central to your job. But even the most well-intentioned efforts to help others can be undermined by a simple truth: We almost always focus on trying to "fix" people, correcting problems or filling the gaps between where they are and where we think they should be.

Unfortunately, this doesn't work well, if at all, to inspire sustained learning or positive change. There's a better way. In this powerful, practical book, emotional intelligence expert Richard Boyatzis and Weatherhead School of Management colleagues Melvin Smith and Ellen Van Oosten present a clear and hopeful message. The way to help someone learn and change, they say, cannot be focused primarily on fixing problems, but instead must connect to that person's positive vision of themselves or an inspiring dream or goal they've long held. This is what great coaches do—they know that people draw energy from their visions and dreams, and that same energy sustains their efforts to change, even through difficult times. In contrast, problem-centered approaches trigger physiological responses that make a person defensive and less open to new ideas. The authors use rich and moving real-life stories, as well as decades of original research, to show how this distinctively positive mode of coaching—what they call "coaching with compassion"—opens people up to thinking creatively and helps them to learn and grow in meaningful and sustainable ways. Filled with probing questions and exercises that encourage self-reflection, *Helping People Change* will forever alter the way all of us think about and practice what we do when we try to help.

### **Helping Educators Grow** *Harvard Education Press*

How can we prepare practicing and aspiring education leaders for the complex, adaptive challenges they face? In *Helping Educators Grow*, Eleanor Drago-Severson presents a new approach to leadership development. Too often, she argues, we teach leadership development the same way we teach world history: just the facts. Instead, we need to create professional learning environments that invite educational leaders to experience the conditions that support adult growth, even as they are learning about them. The book takes as its starting point the premise that adult development is leadership development—that is, the task of school leaders is to develop the capacities of adults as well as students. Drawing on the principles of constructive-developmental theory, Drago-Severson offers a framework for conceptualizing growth based on the core elements of care, respect, trust, collaboration, and intentionality. Richly

informed by examples of effective, developmentally oriented learning experiences for aspiring and practicing leaders, the book includes application exercises and reflective questions to help readers engage with the ideas presented. Widely respected for her groundbreaking work in adult development, leadership, and capacity building in learning communities, Drago-Severson provides the tools and concepts to make any professional learning initiative a developmental opportunity for individuals and groups in a variety of contexts: university-based seminars, professional development workshops, professional learning communities, or peer-to-peer networks.

### **How People Learn** *National Academies Press*

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during

learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

**Losing Ourselves** *Princeton University Press*

Why you don't have a self—and why that's a good thing. In *Losing Ourselves*, Jay Garfield, a leading expert on Buddhist philosophy, offers a brief and radically clear account of an idea that at first might seem frightening but that promises to liberate us and improve our

lives, our relationships, and the world. Drawing on Indian and East Asian Buddhism, Daoism, Western philosophy, and cognitive neuroscience, Garfield shows why it is perfectly natural to think you have a self—and why it actually makes no sense at all and is even dangerous. Most importantly, he explains why shedding the illusion that you have a self can make you a better person. Examining a wide range of arguments for and against the existence of the self, *Losing Ourselves* makes the case that there are not only good philosophical and scientific reasons to deny the reality of the self, but that we can lead healthier social and moral lives if we understand that we are selfless persons. The book describes why the Buddhist idea of no-self is so powerful and why it has immense practical benefits, helping us to abandon egoism, act more morally and ethically, be more spontaneous, perform more expertly, and navigate ordinary life more skillfully. Getting over the self-illusion also means escaping the isolation of self-identity and becoming a person who participates with others in the shared enterprise of life. The result is a transformative book about why we have nothing to lose—and everything to gain—by losing our selves.

### **Learning to Lead, Leading to Learn**

**SPECIAL INTRODUCTORY PRICING:** Enjoy first-week pricing of \$18.95 on paperback books! Regular retail pricing of \$23.95 becomes effective on July 22nd. It all began with the initial chance meeting of this book's author, Katie Anderson, and the book's subject, Isao Yoshino. She was an American leadership coach and consultant in her mid-career, with a newfound love of Japanese culture. He was an accomplished Japanese people-centered

The resulting book - written by Anderson and focused on the profound lessons offered by her mentor Yoshino -- is a beautiful, one-of-a-kind tapestry. Much like the weaving of fabric -- where the beginning work is but a glimpse of the final pattern -- this book was created from many layers of intertwined conversations and reflections. It's a memorable, entertaining, and poignant way to highlight important leadership lessons, to record pivotal moments in Toyota's history, and to create something to help veteran and aspiring leaders reflect and learn about themselves. Yoshino's experiences help us understand how Toyota intentionally developed the culture of excellence for which it is renowned today, and how one person "learned to lead" so that he could lead

with an intention to learn ... every day and in every way. "The only secret to Toyota is its attitude toward learning." -- Isao Yoshino Let the Past Inform the Future: The Role of Reflection in Leadership By looking back at the past, we can learn and therefore shape our future. Through each story in this unique and inspiring book, Anderson shares Yoshino's experiences with leadership and learning, and his efforts at self-improvement while empowering others.
