Melting: Process of change of solid into the liquid. Freezing: The process which helps in transformation of liquid into solid. Vaporisation: Process used to change liquid into gas. Condensation: A process in which gas is transformed into liquid. Sublimation: When solid is changed into gas, it is called as sublimation.

Difference Between Solid, Liquid and Gas (With Comparison ...

Matter usually exists in one of three states or phases: solid, liquid, or gas. The chair you are sitting on is a solid, the water you drink is liquid, and the air you breathe is a gas. Changing State The atoms and molecules don't change, but the way they move about does. Water, for example, is always made up of two hydrogen atoms and one oxygen atom. However, it can take the state of liquid, solid (ice), and gas (steam).
