Middleware Software Solution | Connect Integrate Manage ...

Middleware is computer software that provides services to software applications beyond those available from the operating system. It can be described as "software glue". Middleware makes it easier for software developers to implement communication and input/output, so they can focus on the specific purpose of their application. It gained popularity in the 1980s as a solution to the problem of how to link newer applications to older legacy systems, although the term had been in use since 1968.

Middleware - Wikipedia

Middleware enables the flow of real-time information access within and among

systems in a network. In business, it helps streamline processes and improves efficiency in terms of organization. Since it facilitates communication between systems, it is able to maintain the integrity of information across a multitude of systems within a network.
