Synthesis And Characterization Of Acetaminophen

Abstract. This study describes the synthesis of acetaminophen is quite easy by new method via diazotization reaction. The prepared compound that is initiated from acetanilide as the first step of the reaction followed by nitration reaction of acetanilide to form p-nitroacetanilide , reduction of the

final product to form p-aminoacetanilide, and creating a diazonium salt that is then reacted with solution of (10%,2.5M) sodium hydroxide .
