The autonomic nervous system definition is that it controls all the internal organs unconsciously, through the associated smooth muscle and glands. Functionally, the ANS is divided into sympathetic (SANS) and parasympathetic (PANS) autonomic nervous systems. The sympathetic nervous system definition is informally known as producing the „flight or fight“ state as it is the part of the ANS which is mostly active during stress.PANS dominates during rest, and is more active in „rest and ...

Human body systems: Overview, anatomy, functions | Kenhub

Neuroanatomy is the study of the structure and organization of the nervous system. In contrast to animals with radial symmetry, whose nervous system consists of a distributed network of cells, animals with bilateral symmetry have segregated, defined nervous systems. Their neuroanatomy is therefore better understood. In vertebrates, the nervous system is segregated into the internal structure of the brain and spinal cord and the routes of the nerves that connect to the rest of the body. The delin

The Central Nervous System in the Human Body - Study.com

Like the endocrine system, the nervous system helps control the body’s activities. The main structures of the nervous system are the brain, spinal cord, and nerves. The system conducts stimuli from receptors in the body to the brain and spinal cord and then conducts impulses back to other parts of the body. The human nervous system has two main parts: the central nervous system (the brain and spinal cord) and the peripheral nervous system (the nerves that carry impulses to and from the ...
