### BBC - Earth - The secret of how life on Earth began

Another belief is that life’s building blocks first formed elsewhere in the universe and arrived here embedded in meteors. But that does not answer the question of how life began; it just pushes the issue from earth into space. Scientists speculate about the existence of molecules that preceded genetic material as we know it today.

### How Did Life Start—Creation or Evolution?

The origin of life on Earth is a scientific problem which is not yet solved. There are many ideas, but few clear facts. Most experts agree that all life today evolved by common descent from a single primitive lifeform. It is not known how this early life form evolved, but scientists think it was a natural process which happened about 3,900 million years ago. This is in accord with the philosophy of naturalism: only natural causes are admitted. It is not known if metabolism came first or genetics
