CP - Home - Climate of the Past

Paleoclimatology (in British spelling, palaeoclimatology) is the study of climates for which direct measurements were not taken. As instrumental records only span a tiny part of Earth history, the reconstruction of ancient climate is important to understand natural variation and the evolution of the current climate.

Paleoclimatology - Wikipedia

Abrupt climate changes in Earth history An important new area of research, abrupt climate change, has developed since the 1980s. This research has been inspired by the discovery, in the ice core records of Greenland and Antarctica, of evidence for abrupt shifts in regional and global climates of the past.
