The main focus of behavioural ecologists

has been on the negative effects of parasites on host behaviour. However, there are instances in which infected hosts express more adaptive behavioural phenotypes and have higher fitness relative to uninfected hosts, suggesting that it is sometimes beneficial to be parasitized.

Better with your parasites? Lessons for behavioural ...

We identify two major routes by which parasites might influence the evolution of animal personality. First, because the risk of acquiring parasites can be influenced by an individual's behavioural type, local parasite regimes may impose selection on personality traits and behavioural syndromes (correlations between personality traits).

Parasitism and the evolutionary ecology of animal personality

If host ecological traits affect parasite diversity (Arriero and Moller, 2008; Bordes and Morand, 2009a) and parasites impact host life-traits by diverting resources or eliciting costly immune or behavioural defences (Martin et al., 2008), then potentially strong interactions are expected between determinants and impacts of parasite diversity both at ecological and evolutionary times.
