How Apollo Flew to the Moon by W. David Woods is just a masterpiece of a read. It flows through the missions on a step by step basis, with really good explanations of space travel and gravity, etc. As an Aircraft Engineer I didn't find the book complicated, but neither is it patronising to 'non technical' types.

How Apollo Flew to the Moon

NASA assigned 32 American astronauts to the Apollo lunar landing program, and 24, flying on nine missions between December 1968 and December 1972, orbited the Moon. During six two-man landing missions twelve astronauts walked on the lunar surface, and six of those drove Lunar Roving Vehicles. Three flew to the Moon twice, one orbiting both times and two landing once apiece. Apart from these 24 men, no human being has gone beyond low Earth orbit. The Apollo program included three other crewed mis

The Apollo spacecraft was composed of three parts designed to accomplish the American Apollo program's goal of landing astronauts on the Moon by the end of the 1960s and returning them safely to Earth. The expendable spacecraft consisted of a combined command and service module and an Apollo Lunar Module. Two additional

components complemented the spacecraft stack for space vehicle assembly: a spacecraft-LM adapter designed to shield the LM from the aerodynamic stress of launch and to ...

How Apollo Flew to the Moon by W. David Woods. "This exceptional book describes the manner in which manned spaceships will fly to the Moon (and return!) for most likely decades to come." (David R. Scott, Commander, Apollo 15) Over forty years has elapsed since the Apollo programme achieved its goal of landing a man on the Moon and returning him safely to Earth, yet it remains the only instance of human lunar exploration.
