EXPERIMENT ...**

The near equality in numbers can be attributed to Charles Law. Charles Law states that "as temperature increases, so does the volume of a gas sample when the pressure is held constant". The result of V_1/T_1 and V_2/T_2 were very close to each other. This is due to the fact that this experiment was done in a closed system.

**Charles Law: Volume & Temperature
Lab Answers ...**

Irrespective of which method one uses the objective and result of an experiment remains the same. Charles's law relates volume to temperature at a constant pressure. Thus, in the experiment below, we will be studying volume versus temperature relationship under a constant pressure.

**Charles's Law Experiment ~
ChemistryGod**

The study of change of volume with temperature at a constant pressure for a definite amount of a gas is Charles's law. We can verify the law in several ways. In this article, we will use a syringe to prove volume is directly proportional to temperature and determine the absolute

zero temperature. Two experiments are discussed below.

Objective: The objective of this experiment is to determine the effect of temperature on the volume of gas when the pressure is constant, and to graphically determine the temperature a gas must be cooled to in order to contract the gas to zero volume.

Charles Law Experiment 19 Answers - egotia.enertiv.com

Charles's Law states that the volume of a given mass of gas varies directly with

the absolute temperature of the gas when pressure is kept constant. The absolute temperature is temperature measured with the Kelvin scale. The Kelvin scale must be used because zero on the Kelvin scale corresponds to a complete stoppage of molecular motion.
