Unknown Bacteria Identification | Microbiology study ...

One use of a dichotomous key is to organize large amounts of information so identifications can be made more easily. This method is used to characterize and identify living organisms, including bacteria. The first step in the identification of an unknown bacterium is often to determine its morphology and Gram stain reaction.

6.1: Introduction to Dichotomous Keys - Biology LibreTexts

Creating a dichotomous key requires knowledge on the items to be identified. All dichotomous keys classify known entities, using previous knowledge and definitions. This means that the use of a dichotomous key is by definition restricted to the set of organisms used to create it.
