Handbook of Multilevel Analysis - University of California ...

Multilevel analysis is the statistical analysis of hierarchically and non-hierarchically nested data. The simplest

example is clustered data, such as a sample of students clustered within schools. Multilevel data are especially prevalent in the social and behavioral sciences and in the bio-medical sciences. The models used for this type of data are linear and nonlinear regression models that account for observed and unobserved heterogeneity at the various levels in the data.
