Symbiosis as a Source of Evolutionary Innovation Speciation and Morphogenesis Edited by Lynn Margulis and René Fester

Symbiosis as a Source of Evolutionary Innovation | The MIT ...

Symbiosis is any type of a close and long-term biological interaction between two different biological organisms, be it mutualistic, commensalistic, or parasitic. The organisms, each termed a symbiont, may be of the same or of different species. In 1879, Heinrich Anton de Bary defined it as "the living together of unlike organisms". The term was subject to a century-long debate about whether it should specifically denote mutualism, as in lichens. Biologists have now abandoned that restriction. S

Symbiosis as Source of ...

Symbiosis means living together. It describes close and long-term relationships between different species. The term was used by Anton de Bary in 1879, as "the living together of unlike organisms". A symbiont is an organism living in a relationship with another species in which one or both get benefits. When one species lives inside another species, or a microscopic symbiont lives inside the cells of a host, it is called an endosymbiont. The relevance of symbiosis is its frequency and its evoluti
