The World History of Animation

A lavishly illustrated volume with 250 color images traces the full history of animation from its very inception, looking at examples of the most groundbreaking work from around the globe and describing how animation technique has improved over the years.

Animation

A World History, Foundations-the Golden Age *Focal Press*

A continuation of 1994's groundbreaking *Cartoons*, Giannalberto Bendazzi's *Animation: A World History* is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often-neglected areas and introducing over fifty previously undiscovered artists. Full of first-hand, never before investigated, and elsewhere unavailable information, *Animation: A World History* encompasses the history of animation production on every continent over the span of three centuries. Volume I traces the roots and predecessors of modern animation, the history behind Émile Cohl's *Fantasmagorie*, and twenty years of silent animated films. Encompassing the formative years of the art form through its Golden Age, this book accounts for animation history through 1950 and covers everything from well-known classics like *Steamboat Willie* to animation in Egypt and Nazi Germany. With a wealth of new research, hundreds of photographs and film stills, and an easy-to-navigate organization, this book is essential reading for all serious students of animation history.

The Queens of Animation

The Untold Story of the Women Who Transformed the World of Disney and Made Cinematic History *Little, Brown*

From the bestselling author of *Rise of the Rocket Girls*, the untold, "richly detailed" story of the women of Walt Disney Studios, who shaped the iconic films that have enthralled generations (Margot Lee Shetterly, New York Times bestselling author of *Hidden Figures*). From *Snow White* to *Moana*, from *Pinocchio* to *Frozen*, the animated films of Walt Disney Studios have moved and entertained millions. But few fans know that behind these groundbreaking features was an incredibly influential group of women who fought for respect in an often ruthless male-dominated industry and who have slipped under the radar for decades. In *The Queens of Animation*, bestselling author Nathalia Holt tells their dramatic stories for the first time, showing how these women infiltrated the boys' club of Disney's story and animation departments and used early technologies to create the rich artwork and unforgettable narratives that have become part of the American canon. As the influence of Walt Disney Studios grew -- and while battling sexism, domestic abuse, and workplace intimidation -- these women also fought to transform the way female characters are depicted to young audiences. With gripping storytelling, and based on extensive interviews and exclusive access to archival and personal documents, *The Queens of Animation* reveals the vital contributions these women made to Disney's Golden Age and their continued impact on animated filmmaking, culminating in the record-shattering *Frozen*, Disney's first female-directed full-length feature film. A Best Book of 2019: *Library Journal*, *Christian Science Monitor*, and *Financial Times*

The Story of British Animation *Bloomsbury Publishing*

Jez Stewart charts the course of this extraordinarily fertile area of British film from early experiments with stop-motion and the flourishing of animated drawings during WWI. He reveals how the rockier interwar period set the shape of the industry in enduring ways, and how creatives like Len Lye and Lotte Reiniger brought art to advertising and sponsored films, building a foundation for such distinctive talents as Bob Godfrey, Alison De Vere and George Dunning to unleash their independent visions in the age of commercial TV. Stewart highlights the integral role of women in the industry, the crucial boost delivered by the arrival of Channel 4, the emergence of online animation and much more. The book features 'close-up' analyses of key animators such as Lancelot Speed and Richard Williams, as well as more thematic takes on art, politics and music. It builds a framework for better appreciating Britain's landmark contributions to the art of

animation, including Halas and Batchelor's *Animal Farm* (1954), Dunning's *Yellow Submarine* (1968) and the creations of Aardman Animations.

Wild Minds

The Artists and Rivalries that Inspired the Golden Age of Animation *Atlantic Monthly Press*

"A thoroughly captivating behind-the-scenes history of classic American animation . . . A must-read for all fans of the medium." —Matt Groening In 1911, famed cartoonist Winsor McCay debuted one of the first animated cartoons, based on his sophisticated newspaper strip "Little Nemo in Slumberland," itself inspired by Freud's recent research on dreams. McCay is largely forgotten today, but he unleashed an art form, and the creative energy of artists from Otto Messmer and Max Fleischer to Walt Disney and Warner Bros.' Chuck Jones. Their origin stories, rivalries, and sheer genius, as Reid Mitenbuler skillfully relates, were as colorful and subversive as their creations—from Felix the Cat to Bugs Bunny to feature films such as *Fantasia*—which became an integral part and reflection of American culture over the next five decades. Pre-television, animated cartoons were aimed squarely at adults; comic preludes to movies, they were often "little hand grenades of social and political satire." Early Betty Boop cartoons included nudity; Popeye stories contained sly references to the injustices of unchecked capitalism. During WWII, animation also played a significant role in propaganda. The Golden Age of animation ended with the advent of television, when cartoons were sanitized to appeal to children and help advertisers sell sugary breakfast cereals. *Wild Minds* is an ode to our colorful past and to the creative energy that later inspired *The Simpsons*, *South Park*, and *BoJack Horseman*. "A quintessentially American story of daring ambition, personal reinvention and the eternal tug-of-war of between art and business . . . a gem for anyone wanting to understand animation's origin story." —NPR

Moving Innovation

A History of Computer Animation *MIT Press*

A behind-the-scenes history of computer graphics, featuring a cast of math nerds, avant-garde artists, cold warriors, hippies, video game players, and studio executives. Computer graphics (or CG) has changed the way we experience the art of moving images. Computer graphics is the difference between *Steamboat Willie* and *Buzz Lightyear*, between ping pong and PONG. It began in 1963 when an MIT graduate student named Ivan Sutherland created Sketchpad, the first true computer animation program. Sutherland noted: "Since motion can be put into Sketchpad drawings, it might be exciting to try making cartoons." This book, the first full-length history of CG, shows us how Sutherland's seemingly offhand idea grew into a multibillion dollar industry. In *Moving Innovation*, Tom Sito—himself an animator and industry insider for more than thirty years—describes the evolution of CG. His story features a memorable cast of characters—math nerds, avant-garde artists, cold warriors, hippies, video game enthusiasts, and studio executives: disparate types united by a common vision. Sito shows us how fifty years of work by this motley crew made movies like *Toy Story* and *Avatar* possible.

Floating Worlds

A Short History of Japanese Animation *CRC Press*

Through the analysis of the work of the main Japanese animators starting from the pioneers of 1917, the book will overview the

whole history of Japanese animated film, including the latest tendencies and the experimental movies. In addition to some of the most acclaimed directors Miyazaki Hayao, Takahata Isao, Shinkai Makoto, Tezuka Osamu and Kon Satoshi, the works of masters of animation such as Kawamoto Kihachirō, Kuri Yōji, Ōfuji Noburō and Yamamura Kōji will be analysed in their cultural and historical context. Moreover, their themes and styles will be the linking thread to overview the Japanese producing system and the social and political events which have often influenced their works.

Pulses of Abstraction

Episodes from a History of Animation *U of Minnesota Press*

Reshapes the history of abstract animation and its importance to computer imagery and cinema Animation and technology are always changing with one another. From hand-drawn flipbooks to stop-motion and computer-generated imagery (CGI), animation's identity is in flux. But many of these moving image technologies, like CGI, emerged from the world of animation. Indeed, animation has made essential contributions to not only computer imagery but also cinema, helping shape them into the fields and media forms we know today. In *Pulses of Abstraction*, Andrew R. Johnston presents both a revealing history of abstract animation and an investigation into the relationship between animation and cinema. Examining a rich array of techniques—including etching directly onto the filmstrip, immersive colored-light spectacles, rapid montage sequences, and digital programming—*Pulses of Abstraction* uncovers important epistemological shifts around film and related media. Just as animation's images pulse in projection, so too does its history of indexing technological and epistemic changes through experiments with form, material, and aesthetics. Focusing on a period of rapid media change from the 1950s to the 1970s, this book combines close readings of experimental animations with in-depth technological studies, revealing how animation helped image culture come to terms with the rise of information technologies.

The History of Chinese Animation I *Routledge*

China has been one of the first countries to develop its own aesthetic for dynamic images and to create animation films with distinctive characteristics. In recent years, however, and subject to the influence of Western and Japanese animation, the Chinese animation industry has experienced several new stages of development, prompting the question as to where animation in China is heading in the future. This book describes the history, present and future of China's animation industry. The author divides the business's 95-year history into six periods and analyses each of these from an historical, aesthetic, and artistic perspective. In addition, the book focuses on representative works; themes; directions; artistic styles; techniques; industrial development; government support policies; business models; the nurturing of education and talent; broadcasting systems and animation. Scholars and students who are interested in the history of Chinese animation will benefit from this book and it will appeal additionally to readers interested in Chinese film studies.

Enchanted Drawings

The History of Animation *Outlet*

Hundreds of full-color and black-and-white illustrations and photographs accompany a definitive chronicle of the history of animation, from magic-lantern shows, through the art of Walt Disney and the growth of cartoon characters, to *Beavis and Butthead*.

Pervasive Animation *Routledge*

This new addition to the AFI Film Readers series brings together original scholarship on animation in contemporary moving image culture, from classic experimental and independent shorts to digital animation and installation. The collection - that is also a philosophy of animation - foregrounds new critical perspectives on animation, connects them to historical and contemporary philosophical and theoretical contexts and production practice, and expands the existing canon. Throughout, contributors offer an interdisciplinary roadmap of new directions in film and animation studies, discussing animation in relationship to aesthetics, ideology, philosophy, historiography, visualization, genealogies, spectatorship, representation, technologies, and material culture.

Comic Book History of Animation #1 *IDW Publishing*

The team behind IDW'S Comic Book History of Comics returns with a brand-new series! From Aardman to Zoetrope, Disney to Miyasaki, Hanna-Barbera to Pixar, and everything in between! Part One: Silent...but Deadly (Funny!) shows how the animated cartoon began with the first movies under the lawsuit-happy watch of Thomas Edison... cartoonist Winsor McCay shows how 'toons can make you feel as well as laugh... the Fleischer Brothers revolutionize the technology of animation... and an obscure filmmaker from Kansas City named Walt Disney gets his first big break! The perfect companion piece to CBHoC, the Comic Book History of Animation focuses on the filmmakers and beloved characters of the past century and a half, and is essential for fans of the medium and "toon newbies" alike.

Early British Animation

From Page and Stage to Cinema Screens *Springer*

This book is the first history of British animated cartoons, from the earliest period of cinema in the 1890s up to the late 1920s. In this period cartoonists and performers from earlier traditions of print and stage entertainment came to film to expand their artistic practice, bringing with them a range of techniques and ideas that shaped the development of British animation. These were commercial rather than avant-garde artists, but they nevertheless saw the new medium of cinema as offering the potential to engage with modern concerns of the early 20th century, be it the political and human turmoil of the First World War or new freedoms of the 1920s. Cook's examination and reassessment of these films and their histories reveals their close attention and play with the way audiences saw the world. As such, this book offers new insight into the changing understanding of vision at that time as Britain's place in the world was reshaped in the early 20th century.

Identity in Animation

A Journey into Self, Difference, Culture and the Body *Routledge*

Identity in Animation: A Journey into Self, Difference, Culture and the Body uncovers the meaning behind some of the most influential characters in the history of animation and questions their unique sense of who they are and how they are formed. Jane Batkin explores how identity politics shape the inner psychology of the character and their exterior motivation, often buoyed along by their questioning of 'place' and 'belonging' and driven by issues of self, difference, gender and the body. Through this, *Identity in Animation* illustrates and questions the construction of stereotypes as well as unconventional representations within American, European and Eastern animation. It does so with examples such as the strong gender tropes of Japan's Hayao Miyazaki, the strange relationships created by Australian director Adam Elliot and Nick Park's depiction of Britishness. In addition, this book discusses Betty Boop's sexuality and ultimate repression, Warner Bros' anarchic, self-aware characters and Disney's fascinating representation of self and society. *Identity in Animation* is an ideal book for students and researchers of animation studies, as well as any media and film studies students taking modules on animation as part of their course.

A Moving Subject *CRC Press*

Description: A Moving Subject offers a collection of essays from

around the world. From Italy to the Middle East, from an analysis of *A Night on Bald Mountain* to African cinema animation, these essays help to paint the world of animation in a comprehensive and international manner. Handpicked by renowned animation historian and researcher Giannalberto Bendazzi, this book offers a look at the global foundations of animation from disparate regions, peoples and methods, and helps to demonstrate animation as a unifying factor of the human race. Key Features: A fresh perspective on animation from a global lens A new look into traditional animation produced from around the world Essays that reflect on the nature of colour, animation and light Author: A former professor at the Nanyang Technological University of Singapore and the Università degli Studi di Milan, Italian-born Giannalberto Bendazzi has thoroughly investigated the history of animation for more than forty years. A founding member of the Society for Animation Studies, he has authored or edited various classics in various languages and has lectured extensively on every continent. He received an honorary doctorate from Lisbon University in 2019.

Animation in China

History, Aesthetics, Media *Routledge*

By the turn of the 21st century, animation production has grown to thousands of hours a year in the People's Republic of China (PRC). Despite this, and unlike American blockbuster productions and the diverse genres of Japanese anime, much animation from the PRC remains relatively unknown. This book is an historical and theoretical study of animation in the PRC. Although the Wan Brothers produced the first feature length animated film in 1941, the industry as we know it today truly began in the 1950s at the Shanghai Animation Film Studio (SAFS), which remained the sole animation studio until the 1980s. Considering animation in China as a convergence of the institutions of education, fine arts, literature, popular culture, and film, the book takes comparative approaches that link SAFS animation to contemporary cultural production including American and Japanese animation, Pop Art, and mass media theory. Through readings of classic films such as *Princess Iron Fan*, *Uproar in Heaven*, *Princess Peacock*, and *Nezha Conquers the Dragon King*, this study represents a revisionist history of animation in the PRC as a form of "postmodernism with Chinese characteristics." As a theoretical exploration of animation in the People's Republic of China, this book will appeal greatly to students and scholars of animation, film studies, Chinese studies, cultural studies, political and cultural theory.

Shadow of a Mouse

Performance, Belief, and World-Making in Animation *Univ of California Press*

"Donald Crafton, our lively guide, shows us around a Tooniverse populated by performers, not just images, who engage us in all the ways their flesh-and-blood counterparts do, and then some. Taking classical animation as his terrain, Crafton nevertheless pushes ongoing discussions of performance, liveness, and corporeality in the directions in which they need to go if they are to help us describe and navigate our increasingly virtual worlds." Philip Auslander, author of *Liveness: Performance in a Mediatized Culture* "Every once in a while a book comes along that marks a transformational point in its discipline. Such a book is Donald Crafton's *Shadow of a Mouse*. Crafton skillfully draws together theoretical sources, animation history, technological development, and social analysis, deftly weaving together thinkers from Disney to Deleuze and Sito to Stanislavsky. The result is a substantial rethinking of animation that will reshape

traditional approaches to the medium. Crafton's magisterial grasp of theory and history is livened by a true fan's passion for the subject and a keen sense of humor. *Shadow of a Mouse* is a must-read for anyone with an interest in performance, embodiment, popular culture, race, or reception." Mark Langer, Associate Professor of Film Studies, Carleton University

Animation

Art and Industry *Indiana University Press*

Animation—Art and Industry is an introductory reader covering a broad range of animation studies topics, focusing on both American and international contexts. It provides information about key individuals in the fields of both independent and experimental animation, and introduces a variety of topics relevant to the critical study of media—censorship, representations of gender and race, and the relationship between popular culture and fine art. Essays span the silent era to the present, include new media such as web animation and gaming, and address animation made using a variety of techniques.

Chinese Animation

A History and Filmography, 1922-2012 *McFarland*

With an output of more than 250,000 minutes annually, and with roughly 5,000 producers and production units, the Chinese are leading the field of animated films. Although it is almost impossible to completely cover 90 years of filmmaking, this book provides a comprehensible introduction to the industry's infancy, its Golden Age (Shanghai Animation Film Studio) and today's Chinese animation (in feature films, television series and student films). There are classics such as *Princess Iron Fan* (made at the time of the Japanese occupation) and the color *Havoc in Heaven*, both starring the Monkey King Sun Wukong, as well as countless TV stars (*Blue Cat*, *Pleasant Goat and Big Big Wolf*) and many almost unknown works by young filmmakers who are not focusing on an audience of children (like most of the industry output).

Michael Dudok de Wit

A Life in Animation *CRC Press*

This unique survey of the career of Michael Dudok de Wit discusses all of his works and offers a glimpse into his private life. The biography of this European master of 2D animation, born in the Netherlands and based in London, is the first complete overview of the well-defined and canonic opus of this humble genius. Visually and thematically, Dudok de Wit's poetic and singular style of animation differs from the rest of contemporary independent animation production. This book reveals what still challenges and thrills Dudok de Wit in the art of animation and why he persistently continues to believe in the beauty of hand-drawn animation. Key Features The complete animation production of Michael Dudok de Wit, never-before reviewed in one volume An all-embracing approach regarding this auteur, unavailable elsewhere in one place (his biography, his peculiar method of work, his extracurricular activities) An ad hoc glossary of animation written by Michael Dudok de Wit and a critical reception of his body of work with a wide contribution of his colleagues and collaborators Filmography and bibliography Author Andrijana Ružić graduated in History and Criticism of Art at the Università degli Studi di Milan, Italy, where she fell in love with the medium of animation. She specialised in the History of Animated Film under Giannalberto Bendazzi's mentorship. For the past six years, she has curated the section dedicated to animated films at the International Comics Festival in Belgrade, Serbia. She

is a member of the Selection Board of Animafest Scanner, the symposium for Contemporary Animation Studies at the World Festival of Animated Film held annually in Zagreb, Croatia. She writes about animation and art for the Belgrade weekly magazine Vreme.

Chasing the Scream

The Inspiration for the Feature Film "The United States vs. Billie Holiday" *Bloomsbury Publishing USA*

The New York Times Bestseller What if everything you think you know about addiction is wrong? Johann Hari's journey into the heart of the war on drugs led him to ask this question--and to write the book that gave rise to his viral TED talk, viewed more than 62 million times, and inspired the feature film The United States vs. Billie Holiday and the documentary series The Fix. One of Johann Hari's earliest memories is of trying to wake up one of his relatives and not being able to. As he grew older, he realized he had addiction in his family. Confused, not knowing what to do, he set out and traveled over 30,000 miles over three years to discover what really causes addiction--and what really solves it. He uncovered a range of remarkable human stories--of how the war on drugs began with Billie Holiday, the great jazz singer, being stalked and killed by a racist policeman; of the scientist who discovered the surprising key to addiction; and of the countries that ended their own war on drugs--with extraordinary results. Chasing the Scream is the story of a life-changing journey that transformed the addiction debate internationally--and showed the world that the opposite of addiction is connection.

Animation

From Concepts and Production *CRC Press*

This book explains the creation of animation from concept to production. Instead of focusing on singular aspects of animation production, talented animators can learn to make better films by understanding the process as a whole. Veteran independent filmmaker Hannes Rall teaches you how to develop an animation project from the very start of conceptual exploration through to completed production. Subjects like script, storyboarding, character and production design illuminate the pre-production process; later chapters explain the production process applied to different animation techniques like 2D animation, 3D computer animation and stop motion. This book is just the right mix of practical advice, lavish illustrations, and industry case studies to give you everything you need to start creating animation today. Key Features Learn the concepts of film animation production from an expert instructor Interviews with legends Andreas Deja, Hans Bacher and Volker Engel Robust coverage of the pre-production process, from script to storyboarding and visual development Includes a glossary and further reading recommendations

America Toons In

A History of Television Animation *McFarland*

Animation has been part of television since the start of the medium but it has rarely received unbiased recognition from media scholars. More often, it has been ridiculed for supposedly poor technical quality, accused of trafficking in violence aimed at children, and neglected for indulging in vulgar behavior. These accusations are often made categorically, out of prejudice or ignorance, with little attempt to understand the importance of each program on its own terms. This book takes a serious look at the whole genre of television animation, from the early themes and practices through the evolution of the art to the present day. Examining the productions of individual studios and producers, the author establishes a means of understanding their work in new ways, at the same time discussing the ways in which the genre has often been unfairly marginalized by critics, and how, especially in recent years, producers have both challenged and embraced this "marginality" as a vital part of their work. By taking seriously something often thought to be frivolous, the book provides a framework for understanding the persistent presence of television animation in the American media--and how surprisingly influential it has been.

Experimental Animation

From Analogue to Digital *Routledge*

Experimental Animation: From Analogue to Digital, focuses on both experimental animation's deep roots in the twentieth century, and its current position in the twenty-first century media landscape. Each chapter incorporates a variety of theoretical lenses, including historical, materialist, phenomenological and scientific perspectives. Acknowledging that process is a fundamental operation underlining experimental practice, the book includes not only chapters by international academics, but also interviews with well-known experimental animation practitioners such as William Kentridge, Jodie Mack, Larry Cuba, Martha Colburn and Max Hattler. These interviews document both their creative process and thoughts about experimental animation's ontology to give readers insight into contemporary practice. Global in its scope, the book features and discusses lesser known practitioners and unique case studies, offering both undergraduate and graduate students a collection of valuable contributions to film and animation studies.

Masters of Animation

Drawing the Line

The Untold Story of the Animation Unions from Bosko to

Bart Simpson *University Press of Kentucky*

Some of the most beloved characters in film and television inhabit two-dimensional worlds that spring from the fertile imaginations of talented animators. The movements, characterizations, and settings in the best animated films are as vivid as any live action film, and sometimes seem more alive than life itself. In this case, Hollywood's marketing slogans are fitting; animated stories are frequently magical, leaving memories of happy endings in young and old alike. However, the fantasy lands animators create bear little resemblance to the conditions under which these artists work. Anonymous animators routinely toiled in dark, cramped working environments for long hours and low pay, especially at the emergence of the art form early in the twentieth century. In *Drawing the Line*, veteran animator Tom Sito chronicles the efforts of generations of working men and women artists who have struggled to create a stable standard of living that is as secure as the worlds their characters inhabit. The former president of America's largest animation union, Sito offers a unique insider's account of animators' struggles with legendary studio kingpins such as Jack Warner and Walt Disney, and their more recent battles with Michael Eisner and other Hollywood players. Based on numerous archival documents, personal interviews, and his own experiences, Sito's history of animation unions is both carefully analytical and deeply personal. *Drawing the Line* stands as a vital corrective to this field of Hollywood history and is an important

look at the animation industry's past, present, and future. Like most elements of the modern commercial media system, animation is rapidly being changed by the forces of globalization and technological innovation. Yet even as pixels replace pencils and bytes replace paints, the working relationship between employer and employee essentially remains the same. In *Drawing the Line*, Sito challenges the next wave of animators to heed the lessons of their predecessors by organizing and acting collectively to fight against the enormous pressures of the marketplace for their class interests -- and for the betterment of their art form.

Australian Animation**An International History** *Springer*

This book provides the most comprehensive history and analysis of Australian animation published to date. Spanning from the 1910s to the present day, it explores a wide-range both of independent animation, and of large-scale commercial productions. Presented within a uniquely international context, it details the frequent links between Australian animation and overseas productions. New perspectives and original information are offered on a variety of international subjects such as: Felix the Cat, the Australian Hanna-Barbera studios, and the Australian Walt Disney studios. Drawing on both extensive archival research and original interviews this book illuminates, for the first time, the breadth and richness of Australia's animation history.
