Development in. adolescence.

Adolescence may be defined as that period within the life span when most of a person's characteristics are changing from what is typically considered childlike to what is typically considered adultlike. Changes in the body are the most readily observed, but other, less definitive attributes such as thoughts, behaviour, and social relations also change radically during this period.

Understanding child and adolescent behavior can help parents create rules, boundaries and disciplinary strategies that are appropriate for the child's age and stage of development. For instance, understanding that it is normal for children and young teens to be self-centered and focus on their own needs above those of others can ensure that you do not set behavioral expectations for your child that she cannot achieve.
