Answers may vary. Sample answer: An object that has a lot of inertia has a much stronger resistance to changes in motion. If it is at rest, then it will require more force to start moving it. If it is in motion, then it will require more force to change that motion. Similarly, an object with less inertia has less resistance to changes in motion ...

Answers may vary. Sample answers: (a) Friction makes the action more difficult when turning a door knob. Friction is helpful because it allows your hand to apply a force on the door knob. Static friction prevents the knob from starting to turn and kinetic friction acts opposite to the motion of turning.
