Introductory Graph Theory Answer

The interconnected objects are represented by points termed as vertices, and the links that connect the vertices are called edges. Formally, a graph is a pair of sets (V, E) , where V is the set of vertices and E is the set of edges, connecting the pairs of vertices. Take a look at the following graph –.

What is Graph Theory? Graph theory
concerns the relationship among lines
and points. A graph consists of some
points and some lines between them. No
attention is paid to the position of points
and the length of the lines. Thus, the two

Graph theory in mathematics means the study of graphs. Graphs are one of the prime objects of study in discrete mathematics. In general, a graph is represented as a set of vertices (nodes or points) connected by edges (arcs or line). Graphs are therefore mathematical structures used to model pairwise relations between objects.
