The Perceptual Process. Stimuli (1-2) o Light is reflected/refracted around the stimuli, crating the principle of transformation which states that the stimuli is transformed between the environment to the percept This light is further manipulated by the air particles (further objects seem bluer, fog/mist reduces light intensity) Focused by cornea & lens then is picked up by the retinal receptors (rods/cones) This creates the principle of representation where the tree is ...

### **Summary Sensation and Perception Chapter 1 - 5 - StuDocu**

View Study Guide Sensation and Perception.docx from GNED 129 at Centennial College. Chapter Learning Objective Questions Basic Concepts of

Sensation and Perception What are sensation and perception?

**Study Guide Sensation and Perception.docx - Chapter ...**

Sensation is the actual awareness of our environment through the five senses while perception is the way we interpret this sensory information to tell us something about our environment,

making sense of where we are.

**AP Psychology | Unit 3: Sensation and Perception | Free ...**

Perception happens when the brain organizes and interprets sensory information. Sensation and perception occur together, and normally we don't distinguish between the two separate processes. We use all five of our senses and organize the information we get from them every day of our lives.
