Linux is an operating system, it is just like Windows and Mac OS X. Operating system is a software that leverages hardware of the devices such as the laptop, desktop or tabs to the most. In a simple way, we can say the operating system is a bridge between the software and the hardware.

Introduction to Linux | Components & Characteristics of Linux

The command shell is an application that reads command lines. from the keyboard and passes them to the Linux operating system to be executed. When you login to a remote Linux system, using a tool like `ssh`, you will automatically be connected to a shell. Your computing session is kept separate from other user's computing sessions, because they are “enclosed” in a “shell”.
