The Honda VF750F was a street bike designed by Honda from 1983 to 1985. It had an 86 hp (64 kW), liquid-cooled, V4 engine which sported dual overhead cams (DOHC). The V4's were started a year before with the 1982 Honda Magna VF750C and Sabre VF750S but were adapted for the VF750F in 1983 by reducing the six speed transmission to a five speed because of the change from shaft drive to chain.
