Facial recognition is coming to domestic air travel

Additionally, as recently as 2019, the Department of Homeland Security

announced plans to use facial recognition software to monitor 97% of air travelers. A lack of transparency and further delays to meaningful regulation only allow the programs these tools support to render themselves more essential to the day-to-day operations of law enforcement.

The Problem With Facial Recognition Technology

At the very basic level, face recognition models follow these steps: 1. An input image is fed to the algorithm. 2. The algorithm creates a facial embedding for the input image. 3. The algorithm compares the input image's facial embedding to the embeddings of known faces in the database.

What is Facial Recognition? - Applications & How it Works ...

The Air Force has signed a deal with Trueface, a developer of computer vision systems, to provide facial recognition, license plate recognition and weapon detection for an unnamed air base.

Air Force hires Trueface for facial recognition on bases

Facial recognition systems attempt to identify a human face, which is three-dimensional and changes in appearance with lighting and facial expression, based on its two-dimensional image. To accomplish this computational task, facial recognition systems perform four steps. First face detection is used to segment the face from the image background.
