This program is an evidence based intervention for behavioral in pre-adolescent children (grades 5 and 6). Continuing the work of the Fast Track Program, currently under contract, this intervention targets children who are beginning to show signs of severe aggression and social dysfunction at school. Children who begin to exhibit aggression as pre-adolescents are much more likely to have histories of substance abuse, interpersonal violence, and criminal behavior in their adolescence. By targeting these

children before their behavior has become extremely dangerous or unmanageable, this program has been proven to reduce the occurrence of these problems, and to improve functioning in school. Studies have shown that children who demonstrate aggressive behaviors have maladaptive coping skills and misperceptions of conflict or threat. This program teaches positive strategies for coping with perceived conflict or threat, as well as an understanding of the participant's feelings and motivations behind inappropriate behaviors. The Coping Power program involves an intervention with aggressive children and a simultaneous

program for their parents, to increase positive motivations at home as well as at school. The facilitator's guides include step-by-step instructions for accurately implementing this evidence-based program. This is the corresponding workbook for parents which includes worksheets and monitoring forms to track progress and reinforce the skills learned in the group sessions.

The Mindfulness Workbook for Addiction

A Guide to Coping with the Grief, Stress and Anger that Trigger Addictive Behaviors

New Harbinger Publications

Most addictive behavior is rooted in some type of loss, be it the death of a loved one, coming to terms with limitations set by chronic health problems, or the end of a relationship. By turning to drugs and alcohol, people who have suffered a loss can numb their grief. In the process, they postpone their healing

and can drive themselves further into addiction. The Mindfulness Workbook for Addiction offers readers an effective program for working through their addiction and grief with cognitive behavior therapy (CBT), dialectical behavior therapy (DBT), and acceptance and commitment therapy (ACT). Created by a psychologist who works for the Department of Veterans Affairs and a marriage and family therapist who works for Sharp Mesa Vista Hospital, this mindfulness training workbook is effective for treating the emotion dysregulation, stress, depression, and grief that lie at the heart of addiction. No matter the loss, the mindfulness skills in

this workbook help readers process their grief, determine the function their addiction is serving, and replace the addiction with healthy coping behaviors.
