Smart Communities. Paul Clarke from Esri also stressed the need for people to come first. He came up with a definition for a ‘smart community’: “A smart community must connect people, places and technology to deliver outcomes that improve people’s lives whilst maximising the efficient use of resources.

Connecting Citizens - Smart Cities and Communities 2017 ...

When embarking on projects aimed at creating smart, connected communities, it’s important to: * Avoid silos – a smart community requires collaboration across public sector, business, academia and citizens, combined with a genuine desire to break down internal barriers and securely share data across all parties.

The key to creating smart communities

Esri's smart community information system establishes four technology tenets governments need to deliver smart communities and smart cities. These four tenets are interdependent and made up of complimentary networks of data, solutions, implementations, training, and partners. Founded in location, fueled by data, and designed to improve decision-making, this system works to improve the world we live in. Esri recognizes that with the right people, processes, and technology, any community can ...
