The lab proved many important concepts relating to cellular respiration. From this lab I have concluded that organisms placed in a cold environment will show a lesser rate of cellular respiration than those in an average temperature environment. The lab showed that temperature and respiration rates are proportional to each other.

LAB 6 Fermentation & Cellular Respiration

There are three ways cellular respiration could be measured. The consumption of O2 (how many

moles of O2 are consumed in cellular respiration). Production of CO2 (how many moles of CO2 are produced in cellular respiration?) and the release of energy during cellular respiration. In this lab, the volume of O2 consumed by germinating and non-germinating peas at two different temperatures will be measured. $PV=nRT$ is the inert gas law. P is the pressure of the gas.
