Many Artificial Neural Networks have a lot to do with statistical methods. In the application to landslide susceptibility of Multilayered Perceptron (MLP) and Probabilistic Neural Network (PNN), both techniques can be classified as "black box models", and furthermore, several ANNs have been developed on a statistical basis (Bishop, 1995, Patterson, 1996). For this reason, it is quite difficult to find a widely accepted definition that classifies the differences between ANNs and ...
