Abstract Outlines are given of an 'ethological' programme of research into the social psychology of dementia in old age. Here the manifestations and progress of a dementing illness are seen to be crucially dependent on the nature of the interpersonal context. The quality of dementia care can be evaluated, including quantitative measures.

Person and process in dementia - Kitwood - 1993 ...

The word 'dementia' describes a set of symptoms that may include memory loss and difficulties with thinking, problem-solving or language. These changes are often small to start with, but for someone with dementia they have become severe enough to affect daily life. A person with dementia may also experience changes in their mood or behaviour.
