Historically, the representation theory of finite groups was developed with the same motivation: Turning problems in group theory into problems in linear algebra. The study began with Cauchy and Dedekind's work in the early 1800s on what later became character theory [Cau41, Ded85, Tau33]. However,

KEITH CONRAD Abstract. Representation theory was created by Frobenius about 100 years ago. We describe the background that led to the problem which motivated Frobenius to define characters of a finite group and show how representation theory solves the problem. The first results about representation theory in characteristic p are also discussed.
