An unsaturated solution is one in which a little amount of solute has been added to the solvent. A solution is said to be saturated when a solute is not able to dissolve in the solvent. A supersaturated solution, on the other hand, is when the excess of solute is dissolved in the solvent as a result of changes in temperature, pressure or other conditions.

Unsaturated vs Saturated vs Supersaturated solutions ...

Unsaturated solutions are solutions in which the amount of dissolved solute is less than the saturation point of the solvent (at that specific temperature gradient). If the amount of dissolved solute is equal to the saturation point of the solvent, the solution is called a saturated solution.
