The reliability performance will be uncertain. Generally, suppliers desire to provide components that last longer than the products expected duration of use. Suppliers do not want to field customer complaints that their element of a product is causing premature or early failures.

Reliability Specifications and Requirements

Reliability in Product and Process Development. A product or system's actual reliability performance is a function of the design, assembly, and use. Decisions made during design predominately create the inherent reliability capability performance. The selected components, manufacturing, transportation and installation all can add variability and errors to the product, often reducing the actual reliability performance.

Reliability in Product and Process Development
