Infertility and the Male Reproductive System Infertility is the inability to initiate a pregnancy. Infertility can occur in both men and women, and can be the result of many factors. Cancer related infertility is specifically related to damage of the reproductive organs by the cancer itself, or more commonly, the cancer treatment. For males, this usually means a decrease or complete absence in the number or quality of sperm. Male infertility can result from certain chemotherapy treatments, from

[PDF] the boston ivf handbook of infertility eBook
It shows how experiences of infertility, access to treatment, and medical perspectives on this 'condition' have been mediated by social, political, and cultural discourses. The handbook reflects on and interrogates different approaches to the history of infertility, including the potential of cross-disciplinary perspectives and the uses of different kinds of historical source material, and includes lists of research resources to aid teachers and researchers.

Handbook Of Fertility – PDF Download

A common cause of infertility in men is poor-quality semen, the fluid containing sperm that's ejaculated during sex. Possible reasons for abnormal semen include: a lack of sperm – you may have a very low sperm count or no sperm at all sperm that are not moving properly – this will make it harder for sperm to swim to the egg
