The Network model commonly represents data and relationships through diagrams containing boxes and arrows. Each box represents a record type and each arrow represents a relationship type. A record type will

Network and Relational Data Modeling - Raima

A network model is a database model that is designed as a flexible approach to representing objects and their relationships. A unique feature of the network model is its schema, which is viewed as a graph where relationship types are arcs and object types are nodes. Unlike other database models, the network model's schema is not confined to be a lattice or hierarchy; the hierarchical tree is replaced by a graph, which allows for more basic connections with the nodes.
