Reading this book is an enlightening experience! Weaving a rich tapestry of multicultural myths, ancient legends, and simple folktales, Anita Johnston teaches women how to free themselves from disordered eating by discovering the metaphors that are hidden in their own life stories. "storytellers speak in the language of myth and metaphor," Johnston explains. "they tell us a truth that is not literal, but symbolic. If we hear the stories with only the outer ear, they can seem absurd and untrue, but when listened to with the inner ear, they convey a truth that can be understood and absorbed on a deeply personal level. In this way, stories help us connect with our inner world, to the natural

rhythms and cycles of the earth, and to the power of our intuitive wisdom." ### **In Defence of Food**

#### **The Myth of Nutrition and the Pleasures of Eating** *Penguin UK*

'A must-read ... satisfying, rich ... loaded with flavour' Sunday Telegraph This book is a celebration of food. By food, Michael Pollan means real, proper, simple food - not the kind that comes in a packet, or has lists of unpronounceable ingredients, or that makes nutritional claims about how healthy it is. More like the kind of food your great-grandmother would recognize. In *Defence of Food* is a simple invitation to junk the science, ditch the diet and instead rediscover the joys of eating well. By following a few pieces of advice (Eat at a table - a desk doesn't count. Don't buy food where you'd buy your petrol!), you will enrich your life and your palate, and enlarge your sense of what it means to be healthy and happy. It's time to fall in love with food again. For the past twenty years, Michael Pollan has been writing about the places where the human and natural worlds intersect: food, agriculture, gardens, drugs, and architecture. His most recent book, about the ethics and ecology of eating, is *The Omnivore's Dilemma*, named one of the ten best books of 2006 by the New York Times and the Washington Post. He is also the author of *The Botany of Desire*, *A Place of My Own* and *Second Nature*.

### **Constructing a Diet and Supplement Plan** *Createspace Independent Publishing Platform*

Do you want to lose fat? Build muscle? Feel better? Look younger? Optimize your health? Perform better? Now you can. You don't have to resort to infomercial style gimmicks and gadgets. This book will help you achieve your objectives. It provides the 'source code' to building diet and supplement plans for you (or your clients) no matter your (or their) level of experience. It is interactive: enabling you to follow the path through the book that is most applicable. This book is not meant to be read once, cover-to-cover, and then either committed to memory in some fashion or forgotten about. It's designed to be a tool - a resource - that is used interactively on an ongoing basis. Here is a sampling of FAQs from Chapter 9: Q: Are the recommendations in this book specifically applicable to a gender or age group? A: The short answer is "no." This book is written to be applicable to any healthy adult. Most of it will also apply to teenagers, though the energy expenditure estimations in Chapter 1 may need to be adjusted upward for teens and young adults (folks who are 13-20 years old). For kids younger than 13 - in fact, anyone younger than 18 - these individuals should work with their parent(s)/guardian(s) and their doctor or medical/health care practitioner on applying the principles from this book. Q:

Since you're a vegan, why do you allow for the consumption of animal products in this book? A: I wrote this book for a wide audience. I don't like 'preaching to the choir' as the saying goes. Yes, if you're already eating vegan or plant-based you will benefit from reading this book. But I also want this book to be useful by those following other ways of eating: vegetarians, pescatarians, omnivores, those with allergies and intolerances, etc. I like to meet people where they are - not where I think they should be or others think they should be. I also don't view the movement from the typical western diet to a vegan or plant-based diet as having to be transformational - that is, a giant leap - it can be incremental. Some people will take baby steps, and that is okay. Some people will take no steps at all and choose to eat as much animal product as they can while following my plans. That's the choice of each individual to make, though I hope most move in the direction of plant-based and vegan eating - even if only by an inch or two. Of course, I would love it if everyone on earth stopped consuming animal products, but each individual needs to make this choice freely. Q: Why don't you emphasize exercise for fat loss? A: If your diet and sleep habits are off, then fat-burning exercise is not going to help you very much. There is a saying out there that is quite true: "you can't out-exercise a bad diet." This is true calorically speaking, since you can eat and drink a 1,000 calories very easily at a restaurant without even thinking about it, but would have to push yourself pretty hard to burn 1,000 calories during exercise (and you'd also find yourself pretty darn hungry shortly thereafter and likely to binge). But it's also true hormonally speaking: you can't out-exercise a hormonal s\*\*t-storm (pardon my French!). If your diet and sleeping habits are

off, you will only make a bad situation worse by piling on exercise. As just one example, cortisol, the so-called stress hormone, is elevated by exercise, lack of sleep, caffeine, stress, and other factors. If you have cortisol levels that are continuously elevated you'll have a heck of a time losing fat; you'll also be putting your overall health at risk. (By the way, this doesn't mean you shouldn't exercise. It just means you shouldn't view exercise as the magic bullet for fat loss. Exercise has many other benefits. Also, more is not better: you want to exercise the right amount based on your needs, capabilities, and objectives.)

## Eating Asian America

### **A Food Studies Reader** *NYU Press*

Chop suey. Sushi. Curry. Adobo. Kimchi. The deep associations Asians in the United States have with food have become ingrained in the American popular imagination. So much so that contentious notions of ethnic authenticity and authority are marked by and argued around images and ideas of food. *Eating Asian America: A Food Studies Reader* collects burgeoning new scholarship in Asian American Studies that centers the study of foodways and culinary practices in our understanding of the racialized underpinnings of Asian Americanness. It does so by bringing together twenty scholars from across the disciplinary spectrum to inaugurate a new turn in food studies: the refusal to yield to a superficial multiculturalism that naively celebrates difference and reconciliation through the pleasures of food and eating. By focusing on multi-sited struggles across various spaces and times, the contributors to this anthology bring into focus the potent forces of class, racial, ethnic, sexual and gender inequalities that pervade and persist in the production of Asian American culinary and alimentary practices, ideas, and images. This is the first collection to consider the fraught itineraries of Asian American immigrant histories and how they are inscribed in the production and dissemination of ideas about Asian American foodways.

### **Stories I Tell My Patients**

#### **101 Myths, Metaphors, Fables and Tall Tales for Eating Disorders Recovery**

*Stories I Tell My Patients* by Arnold Andersen, M.D., has been an intermittent feature in *Eating Disorders: The Journal of Treatment and Prevention* from 1993 to 2015. The complete set of 101 stories is collected here for the first time. Combining myth, metaphor, fable, tall tale, and inventive fantasy, they help professionals and patients alike overcome eating disorders. An eclectic mix, Arnold's stories are both entertaining and insightful. Some are vaguely familiar, such as the retelling of "The Emperor Has No Clothes" or Faustian deals with the devil. There are knights in shining armor, time machines, intergalactic travelers, stories derived from Greek mythology, anorexic saints of the 16th century, and current events. Most of the stories sprang from Arnold's imagination, and many were inspired by his direct interactions with patients. Inanimate objects such as buoys and thermometers carry on conversations, and descriptions of Paris reflect the author's love of that beautiful city. The stories are not meant ultimately to cure eating disorders but rather to get attention and convey an idea. No matter how old we get, we can relate to roses and bike trips, shadows and catsup.
