Mathematical Methods For Partial Differential

The partial differential equation takes the form.

$$Lu = \sum_{\nu=1}^n A_{\nu} \frac{\partial u}{\partial x_{\nu}} + B = 0, \text{ where the coefficient matrices}$$

A_{ν} and the vector B may depend upon x and u . If a hypersurface S is given in the implicit form.

Numerical Methods for Partial Differential Equations is an international journal that aims to cover research into the development and analysis of new methods for the numerical solution of partial differential equations. Read the

journal's full aims and scope.

Numerical Methods for Partial Differential Equations ...

The chapter considers four techniques of solving partial differential equations: separation of variables, the Fourier transform, the Laplace transform, and Green's functions. The chapter solves each of these equations in Cartesian coordinates by separation of variables. The chapter considers the case of Laplace's equation in two variables.
