Borderline

Personality Disorder The Road

People with borderline personality disorder, or BPD as it's often known, experience very changeable emotions often triggered by their relationships. At times of stress, these emotions can become so intense that they feel that they cannot cope and don't want to be alive. Some people might also feel like they want to hurt others.

Borderline personality disorder (BPD) - YoungMinds

It includes self-image issues, difficulty managing emotions and behavior, and a pattern of unstable relationships. With borderline personality disorder, you have an intense fear of

abandonment or instability, and you may have difficulty tolerating being alone. Yet inappropriate anger, impulsiveness and frequent mood swings may push others away, even though you want to have loving and lasting relationships.

disorder, unspecified. Borderline personality disorder differs from the other PDs in important ways. It is probably less stable and lifelong than other PDs, although this may be an artefact of the larger body of research devoted to BPD. It appears to be less pervasive, meaning people with BPD tend not to present in the same way in different situations. This is curious, as pervasiveness is a central element of the personality disorders.

Borderline | Personality disorder

Borderline personality disorder (BPD) is a type of personality disorder. You might be diagnosed with a personality disorder if you have difficulties with how you think and

feel about yourself and other people, and are having problems in your life as a result.
