Industrial Water Quality

The quality of the water used in your industrial processes affects the quality of the goods and services you offer, and directly impacts your ROI. Water quality management is also critical for maintaining compliance with increasingly stringent environmental, safety and industry standards. Earthwise Environmental has been a leader in the water treatment consulting and management industry since 1995.

Industrial Water Quality Management | Earthwise Environmental

Industrial water use is declining in the United States, with the year 2000 showing the lowest level since reporting of industrial water use began in 1950. Worldwide, high-income countries use 59 percent of their water for industrial use, while low-income countries use 8 percent (2).

Industrial Water | Other Uses of Water | Healthy Water | CDC

Industrial water quality is critical in the processing, washing, diluting, cooling, and transportation of most manufactured products. According to the Water Resources Group, the demand for water is rapidly increasing, and is expected to exceed the current supply by 40% by 2030. Industry realizes that production methods that waste water jeopardize long-range operation plans and production costs.
