Sequential Manual Transmission Cars

A sequential manual transmission, also known as a sequential gearbox, or a sequential transmission, is a type of non-synchronous manual transmission used mostly for motorcycles and racing cars. It produces faster shift times than traditional synchronized manual transmissions, and restricts the driver to selecting either the next or previous gear, in a successive order.

Sequential manual transmission - Wikipedia

The car has a sequential six-speed transmission, so instead of the H-pattern seen on a normal manual transmission, the shifter moves in a straight line. Nearly every race car that has a manual transmission uses the sequential approach rather than the "H" pattern. There are four main reasons for this preference: The sequential shift is quicker.
