Clinical guidelines in child health

It also states that clinical guidelines are more likely to be used if they are evidence-based, rigorously produced, simple, flexible and perceived to be helpful. This means they can be adapted to local requirements and patient needs. The validity of any clinical guideline is related to four important factors: a) composition of the Guideline Development Group (GDG) and its processes; b) identification and appraisal of evidence; c) method of guideline construction and c) external peer review.
