Bilingualism and Second Language Acquisition > SCILT

In the first half of the 20 th century, the prevailing view was

that bilingualism and second-language acquisition early in life made children confused and interfered with their ability to develop normal cognitive functions 1 and succeed in educational environments. 2 These ideas were dramatically reversed in a landmark study by Peal and Lambert 3 that showed a general superiority of bilinguals over monolinguals in a wide range of intelligence tests and aspects of school achievement.
