If the reference count of array is greater than one, the GArray wrapper is preserved but the size of array will be set to zero. If array contents point to dynamically-allocated memory, they should be freed separately if free_seg is TRUE and no clear_func function has been set for array. This function is not thread-safe. If using a GArray from multiple threads, use only the atomic g_array_ref ...

Description. Memory slices provide a space-efficient and multi-processing scalable way to allocate equal-sized pieces of memory, just like the original GMemChunks (from GLib 2.8), while avoiding their excessive memory-waste, scalability and performance problems. To achieve these goals, the slice allocator uses a sophisticated, layered design that has been inspired by Bonwick's slab allocator ...
