Why HF radio

remains critical to military communications

High frequency is the ITU designation for the range of radio frequency electromagnetic waves between 3 and 30 megahertz. It is also known as the decameter band or decameter wave as its wavelengths range from one to ten decameters. Frequencies immediately below HF are denoted medium frequency, while the next band of higher frequencies is known as the very high frequency band. The HF band is a major part of the shortwave band of frequencies, so communication at these frequencies is often called sh
