ASSOCIATED ...

On the basis of evidence from human studies, 18 of the 54 chemicals and industrial processes are human carcinogens. A further 18 chemicals are probably carcinogenic for humans, although the data were considered not adequate to establish a causal association.

Chemicals and industrial processes associated with cancer ...

Overhanging everything that the modern chemical industry does is its effect on the environment, in terms of energy and material use and the waste it produces. Thus other units are devoted to recycling and Green chemistry. In this section on processes, there are units on: Catalysis in industry; Chemical reactors; Cracking and related refinery processes

Industrial processes - Essential Chemical Industry

Modern petroleum industrial processes, however, bring about chemical changes, and some of the products of a modern refinery complex are chemicals by any definition. The term petrochemical is used to describe these chemical operations, but, because they are often carried out at the same plant as the primary distillation, the distinction between petroleum industry and chemical industry is difficult to maintain.
