Evolution Of Animal Diversity Study Guide Answers

Animal Evolution. Life on Earth didn't start out with animals. All life on earth started from the primordial ooze, where inorganic molecules produced organic molecules, organic molecules formed bigger molecules, and, eventually organic molecules hung together inside membranes. That led to cell-like structures and then cells. Simpler cells led to cells that are more complex.

Animal Evolution Help | Animal Evolution and Diversity ...

The diverse appearance of animals is mostly superficial; the bewildering variety of known forms, some truly bizarre, can be assorted among a mere half-dozen basic body plans. These plans are established during the embryonic stages of development and limit the size and complexity of the animals. Symmetry, number and relative development of tissue layers, presence and nature of body cavities, and several aspects of early development define these fundamental modes of organization.
