An Insider's Guide to the New Science of Space Travel *Princeton University Press*

When a leaf falls on a windy day, it drifts and tumbles, tossed every which way on the breeze. This is chaos in action. In Fly Me to the Moon, Edward Belbruno shows how to harness the same principle for low-fuel space travel--or, as he puts it, "surfing the gravitational field." Belbruno devised one of the most exciting concepts now being used in space flight, that of swinging through the cosmos on the subtle fluctuations of the planets' gravitational pulls. His idea was met with skepticism until 1991, when he used it to get a stray Japanese satellite back on course to the Moon. The successful rescue represented the first application of chaos to space travel and ushered in an emerging new field. Part memoir, part scientific adventure story, Fly Me to the Moon gives a gripping insider's account of that mission and of Belbruno's personal struggles with the science establishment. Along the way, Belbruno introduces readers to recent breathtaking advances in American space exploration. He discusses ways to capture and redirect asteroids; presents new research on the origin of the Moon; weighs in on discoveries like 2003 UB313 (now named Eris), a dwarf planet detected in the far outer reaches of our solar system--and much more. Grounded in Belbruno's own rigorous theoretical research but written for a general audience, Fly Me to the Moon is for anybody who has ever felt moved by the spirit of discovery.

The Osage Murders and the Birth of the FBI *Vintage*

NATIONAL BOOK AWARD FINALIST • NATIONAL BESTSELLER • A twisting, haunting true-life murder mystery about one of the most monstrous crimes in American history, from the author of The Lost City of Z. In the 1920s, the richest people per capita in the world were members of the Osage Nation in Oklahoma. After oil was discovered beneath their land, the Osage rode in chauffeured automobiles, built mansions, and sent their children to study in Europe. Then, one by one, the Osage began to be killed off. The family of an Osage woman, Mollie Burkhart, became a prime target. One of her relatives was shot. Another was poisoned. And it was just the beginning, as more and more Osage were dying under mysterious circumstances, and many of those who dared to investigate the killings were themselves murdered. As the death toll rose, the newly created FBI took up the case, and the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to try to unravel the mystery. White put together an undercover team, including a Native American agent who infiltrated the region, and together with the Osage began to expose one of the most chilling conspiracies in American history.

How Evelyn Glennie, a Deaf Girl, Changed Percussion *Penguin*
A gorgeous and empowering picture book biography about Evelyn Glennie, a deaf woman, who became the first full-time solo percussionist in the world. "No. You can't," people said. But Evelyn knew she could. She had found her own way to listen. From the moment Evelyn Glennie heard her first note, music held her heart. She played the piano by ear at age eight, and the clarinet by age ten. But soon, the nerves in her ears began to deteriorate, and Evelyn was told that, as a deaf girl, she could never be a musician. What sounds Evelyn couldn'thear with her ears, though, she could feel resonate through her body as if she, herself, were a drum. And the music she created was extraordinary. Evelyn Glennie had learned how to listen in a new way. And soon, the world was listening too. "Radiant." —Publishers Weekly "Perfect for elementary school readers . . .
