Big O notation (with a capital letter O, not a zero), also called Landau's symbol, is a symbolism used in complexity theory, computer science, and mathematics to describe the asymptotic behavior of functions. Basically, it tells you how fast a function grows or declines.

Session Overview This lecture revolves around the topic of algorithmic efficiency. It introduces the random access model (RAM) of computation and "big O notation" as a way to talk about order of growth. It concludes with binary search.

#### Efficiency and Order of Growth | Unit 1 - MIT OpenCourseWare

Big O notation is useful when analyzing algorithms for efficiency. For example, the time (or the number of steps) it takes to complete a problem of size  $n$  might be found to be  $T(n) = 4n^2 - 2n + 2$ . As  $n$  grows large, the  $n^2$  term will come to dominate, so that all other terms can be neglected—for instance when  $n = 500$ , the term  $4n^2$  is 1000 times as large as the  $2n$  term.

#### Big O notation - Wikipedia

Big O Notation in Mathematics. In mathematics (big) O or 'order' notation describes the behaviour of a function at (a point) zero or as it approaches infinity. With O notation the function is usually simplified, for example to a power of or an exponential, logarithm1, factorial2function, or a

combination of these functions.

### Big O Notation in Mathematics

Big O notation is a notation used when talking about growth rates. It formalizes the notion that two functions "grow at the same rate," or one function "grows faster than the other," and such. It is very commonly used in computer science, when analyzing algorithms.

So for example, we had the tilde notation. And we wrote  $f$  of  $x$  is tilde  $g$  of  $x$  if the limit as  $x$  goes to infinity of  $f$  over  $g$  is 1. Now the next one--and most commonly used one in computer science--is called the  $O$  notation, or the big  $O$ . And it's written like this.  $f$  of  $x$  equals  $O$  of  $g$  of  $x$ . And it means that the limit as  $x$  goes to infinity of the absolute value of  $f$  of  $x$  over  $g$  of  $x$  is convergence--is less than infinity.
